32 Reported Dead in Appalachia Floods
Cars were stacked up in Virginia after floods caused by more than six inches of rain. Hundreds were left homeless and thousands without power. Thirty-two persons died. Twenty people were listed as missing in West Virginia. While the rains had ended in most places Wednesday, flood warnings remained in effect for Virginia and Maryland. Damage was put at hundreds of millions of dollars.

Jaruzelski Gives Up One Post, Assumes Another

WARSAW — General Wojciech Jaruzelski, the Polish leader, stepped down Wednesday as prime ister but assumed the ceremonial post of state president when the parliament elected him chairman of the Council of State.

General Jaruzelski, 62, the army general who declared martial law in 1981 to crush the Solidarity trade union, retained his title of Communist Party first secretary, the most powerful position in Poland. A Politburo member, Zbigniew

essner, was elected as prime minister and asked to form a govern-General Jaruzelski's election to

the state presidency underscored the belief that he would remain the dominant political figure in Po-land. He rapides thenryk Jab-louski as president.

General Jaruzelski's resignation apparently signaled the end of the political crisis that led to martial law and suppression of the Solidarity labor movement in 1981.

The Communist Party, the real power in Poland, is believed to have lost nearly one million members after labor turmoil in 1980 gave rise to Solidarity.

The government suppressed Soi-December 1981, and outlawed the Soviet bloc's only independent la- or parliament.

U.S. Won't Delay SDI, Reagan Now Declares

By Michael Purzel The Associated Press

WASHINGTON - President Ronald Reagan said Wednesday that he would unilaterally deploy the proposed U.S. space-based mis-sile defense if he could not get other world leaders to agree on an international system to defend against

Speaking to correspondents of Western news agencies, Mr. Rea-gan said that comments he made in an interview with four Soviet journalists had been erroneously inter-

In that interview, he appeared to make deployment of the Strategic Defense Initiative, or SDI, contingent on the dismantling of nuclear

Asked if he meant to give the Soviet Union veto power over deployment of the proposed defen-sive system, frequently called "star wars," the president replied. Would you forgive me if I say.

Mr. Reagan said that his concept was that "if and when we finally achieve our goal, and that is a weapon that is effective against incoming missiles," then "rather than add to the distrust in the world and appear to be seeking the potential for a first strike by rushing to im-plement, my concept has always been that we sit down with the other nuclear powers, our allies and our adversaries, and see if we cannot use that weapon to bring about the elimination of nuclear

He added that if an international conference failed to reach agree-

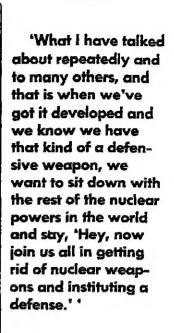

ment for mutual use of SDI "we would go ahead with deployment." In the interview Wednesday, Mr. Reagan also made the following He believes it is possible that

Moscow orchestrated the three recent incidents in which citizens of the Soviet Union, one a high-ranking KGB officer, sought to defect to the United States, then announced their desire to return

There is "every indication" that Mikhail S. Gorbachev is "a reasonable man," which gives Mr. Reagan hope that he can convince the Soviet leader at their summit meeting in Geneva that the United States has no expansionist aims.

 He refused to comment on reports the CIA was trying to overthrow Colonel Moamer Qadhafi, officially on sick leave the leader of Libya. Mr. Reagan would say only that "we don't have

The Selling of Star Wars: A Childishly Simple Task

By Lloyd Grove

Washington Pint Service TAKE ONE: A panicked housevife and her 18-month-old baby face ninent nuclear annihilation in the kitchen. Sirens blare. An urgent voice is heard: "Once nuclear mistiles are launched, we cannot shoot them down. All we can do 15 ... wast." Fade to portrast of Ronald Reagan. "But there is hope."

TAKE TWO: Bob and Harry are lounging on a park bench one fine afternoon. "Hey, Harry, know anything about this 'star wars' stuff?"
Bob asks. "Yeah," says Harry. "Turns out that all this time we've never had a way to keep nuclear missiles from getting here." Bob looks surprised. "Never had a way." Harry nods. "Nope."

WASHINGTON - How to market the Strategic Defense Initiative, otherwise known as "star

The question was taxing the best and the brightest of television advertising people late last summer. as High Frontier, the pre-eminent SDI advocacy group, invited some of the ad game's most creative minds to bid on the "star wars"

Their ideas were creative indeed, worthy of Wheatles and Calvin klein jeans. National Media proposed the housewife and baby spot, while Ringe Media Inc. offered the park bench vignette.

A third agency. Hal Larson Etc., went so far as to rename President Ronald Reagan's proposed missile defense system "The New Freeze," thus stealing verbal thunder from the politically hostile nuclear freeze

The privately funded High Fron-uer and its public relations arm, the Coalition for the Strategic Defense Initiative, rejected dozens of such suggestions from 12 ad agencies before getting its commercial onto the airwaves in late October.

In early September, with no decision made, the group invited Don Ringe, of Ringe Media Inc. and the park bench, to pitch another idea.

He showed up at High Frontier's offices in downtown Washingto with two crayoned doodles on scrap paper, dashed off, left-handed, by his right-handed girlfriend, a computer analyst named June Kelty. The doodles showed stick figures, a house and a sad-eyed sun.

Doubts About Autonomy Amid Micronesia's Palms

Long Reliance on U.S. Has Failed to Prepare Pacific Islanders for Limited Self-Government

By Clyde Haberman New York Times Service

MOEN, Truk Islands - A few years back the Municipal Assembly banned all alcohol sales on this craggy island in the Western Pacific.

Prohibition has worked about as well as it did in the United States 60 years ago. Now people break the law to drink. Moen's police chief decided he would

not even pretend to enforce the rules. His defiance so upset Mayor Fichita Bossy that he opened his own jail for liquor violators. Unfortunately for the mayor. Truk state officials closed down his operation for sanitation-code infractions.

This might be dismissed as mere comedy

were it not for the seriousness of alcohol abuse not only in Truk but throughout the 2,000 islands in the vast Pacific chain known as Micronesia. From the highest official on down, Micronesians list drinking as one of their most debilitating social problems and the chief cause of nearly all violent crime.

Trukese say that Moen's liquor ban has cleared the streets of many drunkards prone to knife fights. But it has also created a new category of lawlessness and has basically failed, they say.

Some people then add as a postscript: just like so many other ideas borrowed from the United States.

Having spent the last 38 years as a U.S. Trust Territory. Micronesia is now an assortment of young governments looking for limited political autonomy. The transition process has been arduous, often bogged down in disputes with Washington over the conditions for home rule.

Lange insisted Wednesday that his country did not negotiate with France. over the fate of two French agents involved in sinking the Rambow

Warrior protest ship.

Mr. Lange said through a spokesman that no negotiations had been held on a political level over the trial or sentencing of Captain Dominique Prieur, 36, or Major Alain Mafart, 35. The French secret agents were arrested by the New Zealand authorities in July after an explosion sink. the ship belonging to the environmental group Greenpeace. A crew member was killed in the blast in Auckland harbor.

Two French ministers have said there were contacts between the two

crustries over the fate of the French spies, who pleaded guilty to manslaughter and sabotage charges Monday after charges of murder were dropped. Semencing is scheduled Nov. 22. Mr. Lauge's latest rejection of the French assertion, his third store Monday, followed a statement by Roland Dumas. France's minister for foreign relations, that negotiations had taken place.

Portugal's Prime Minister Sworn In

LISBON (Reuters) — Anibal Cavaco Silva was sworn in Wednesday is prime minister, and promised that his center-right Social Democratic government would not allow Portugal to become Europe's poor relation" after it is admitted to the European Community in January. Mr. Cavaco Silva, 46, said the poverty and underdevelopment that have plagued Portugal could not be tolerated in a country about to join the community. "We are counting on Europe, we want it to count on us," he said. "We will not be Europe's poor relation."

The Social Democrats' campaign in the October general election emphasized business confidence and growth after austerity measures. taken by the previous Socialist-led government led to a drop in invest-ment and real salaries. Mr. Cavaço Silva's party holds 88 of 250 seats in the new parliament.

Central America Arms Money Sought.

Marcos Will Handpick Running Mate

MANILA (AP) - President Ferdinand E. Marcos said Wednesday that he would handpick his vice presidential running mate if an election is held in January as he has proposed. He said he would call a caucus of his ruling New Society Movement on Friday to discuss election matters. Political tradition in almost all democratic countries is that the running mate for vice president is usually the personal choice of their

president," Mr. Marcos said. Asked what criteria he would use in selecting his running mate, he said:

"Prestige, strong popular appeal and, more than this, that if anything happens to the president, he will make a good, credible president." His wife, Imelda Marcos, who returned Wednesday from a trip to the United." States, Italy, the Soviet Union and Japan, denied that she had any intention of running for the vice presidency.

For the Record

It showed that 50 percent of the electorate would vote now for Prime Minister. David Lange's administration.

Rise Charted in U.S. Life Expectancy

Havaii Residents Are Said to Have Best Chance of Longevity

By Spencer Rich

Washington Poer Service
WASHINGTON — Residents
of Hawaii have the highest life expectancy in the United States and esidents of Washington, D.C., the nation's capital have the lowest. according to a report by the Na-tional Center for Health Statistics.

The study indicated that life exectancy for all U.S. population groups now is about a year more than in the 1979-81 period and four years more than in 1969-71;

Derived from the 1980 federal census and from death rate statistics, the report estimates that the average life expectancy of Hawaii esidents in the years from 1979 to 1981 was 77.02 years, with men at 74.08 years and women at 80.33.

The District of Columbia trailed the 50 states, with an overall life expectancy of 69.20 years, 64.55 years for men and 73.70 for wom-

The figures, released Tuesday. were the latest available for individual states and represent the to 1981 continued throughout their

Nationwide, the states with the ighest life expectancy rates from 1979 to 1981, after Hawaii, were: Minnesota, Iowa, Utah, North Dakota, Nebraska, Wisconsin, Kansas, Colorado, Idaho, Washington and Connecticut.

Many of the southern states were among the lowest in life expectancy. Ranked just above the District Columbia were Tennessee, Delavare, Kentucky, North Carolina, West Virginia, Nevada, Alabama, Alaska, Georgia, Mississippi, South Carolina and Louisiana.

In a recent report on minority health, Margaret M. Heckler, the secretary of health and human services, said that department statistics showed persons of Asian and Pacific island origin to be the healthiest in the nation, possibly because they eat and drink less

than others. This might help explain why Hawall, with a large population of Asian origin, showed the highest

life expectancy. The large number of blacks with

low incomes in the District of Columbia and in southeastern states

could explain the low rates of life

The life expectancy of women has long been higher than that of men. Explanations that have been offered include; genetic differences; less job stress because fewer women worked outside the home; and lower rates of smoking and drinking.

The Heckler report said that be

cause of low income, blacks and

some other minority-group mem-,

Fighting Breaks Out in Beirut As Peace Effort Comes to Halt

BEIRUT - Fighting between Moslems and Christians erupted Wednesday in Beirut as a Syrian--backed peace drive came to a temporary standstill because of objections from Christian political

There was several hours of fighting along the so-called Green Line separating Beirut's Christian and Moslem-held sectors. Shells hit nearby residential districts in the worst clashes since Christian. Druze and Shiite Moslem militias

reached a draft peace accord 12 days ago in Damascus. The clashes started as a radio controlled by the Christian Lebanese Forces militia said the draft needed more discussion and "correction" after strong criticisms Tuesday by two former Christian presidents, Camille Chamoun and

Suleiman Franjieh.

The Lebanese pound, a sensitive political barometer, plunged on exchange markets.

Mosiem political sources in Beirut, however, said Syrian leaders still believed the draft pact would bear fruit

Voice of Lebanon radio, controlled by the Lebanese Forces, also quoted a Christian militia source as saying the peace drive was not reverting to "zero," al-

though the militia had made sugaestions for altering it. There were no new talks in Damascus during the day and the pound fell in Beirut from 16.45 to 17.42 to the dollar after surging on

peace hopes in the past two weeks. Christian militia officials who returned Tuesday night from talks in Damascus said for the first time

that the draft was "not the final version of the agreement."

Karpov Wins, Narrows Lead in Chess

Chilled

MOSCOW - The challenger. Gary Kasparov, resigned Wednesday without resuming play in the adjourned 22d game of the world chess championship against Ana-

Mr. Karpov is now trailing by one point, with two games to play. Mr. Kasparov leads the series by Il'2 points to 1012.

Mr. Karpov will retain his title in the event of a 12-12 tie. A draw counts for a half point for each player. A win counts for one point. Mr. Kasparov's former lead of experts as unbeatable so late in the championship. Mr. Karpov's confident comeback surprised the crowd and grandmasters. if Mr. Karpov draws the next game, in which he has the black

pieces, the stage will be set for a decisive final game, with the cham-pion having the advantage of white and needing a victory to retain a title that he has held for 10 years.

Soviet sources said arbiters had refused a request by Mr. Karpov to spone the next game, scheduled for Saturday, until Sunday.

He explained: "The fact that Tom Kean and the party are running so strongly is a continuation of what we saw in last year's presidential election — a strong Republican candidate cracking Democratic voting groups." In Virginia, Mr. Fahrenkopf said. "We allowed the Democrats

to out-Republican us." He added: Full winter

Craxi Returns Stronger

Bettino Craxi, having survived a three-week government crisis, is back in office and on his way to becoming the longest-serving prime minister in postwar Italy. Later this month he will beat the record of two years and three months in office set by the late Aldo Moro, a Christian Democrat.

Beyond Mr. Craxi's personal triumph. and beyond the Byzantine maneuvering of the parties and the oratory in Parliament. several important political facts emerge from the crisis that wasn't.

Some of the policies over which Defense Minister Giovanni Spadolini and his Republican colleagues provoked Mr. Craxi's now revoked resignation have been reinforced instead of watered down. This is

true above all of Italy's Middle East policy. A Mediterranean country with major economic, political and security interests in the Arab world, Italy had long been conducting Middle East policies that differed sharply from those of America. Although Mr. Craxi and his Christian Democratic foreign minister, Giulio Andreotti, carried the pro-Arab, pro-Palestinian tilt further than their predecessors, these policies had remained a matter of "pragmatism" and even expediency, and were never elevated to the status of a national strategy. This, though, is what they became when the prime minister reiterated them without major change in his speech to the Chamber of Deputies on Monday and made them part of the platform for future action by the five-party coalition.

In addition, Mr. Craxi, one of Italy's most "pro-NATO" and "pro-American" politicians, has been able to drape himself in the mantle of an Italian superpatriot for stand-

ing up to President Reagan during the confrontation between American and Italian troops at the NATO base of Sigonella. In his statement in the Chamber he declared that a NATO base on Italian soil must never again be misused as he feels Sigonella was by the United States after the Achille Lauro hijacking. Italian politicians in power do not often

use such terms in speaking of the alliance. How long will Mr. Craxi's new strength last? His next task is to get the 1986 budget through Parliament, if possible before the end of the year. The aborted government crisis has cost him valuable time. All five parties in his coalition are on record as opposing inflation and favoring a reduction of the huge state deficit, but there is no real consensus about the tough economic measures that are actually required.

The Communists, who had fought Mr. Craxi tooth and nail ever since he came to power, praised him for his stand during the Achille Lauro affair. But whether they will heed the appeal that he made in the Chamber on Monday for a moderate approach to the budget debate remains to be seen. They can obstruct the economic debate in the country even though they cannot bring the government down in Parliament.

If Prime Minister Craxi has been allowed to stay in office with unchanged policies and an unchanged cabinet, it is because no party in the coalition was prepared for the only possible alternative - early national elections. It is also because the Christian Democrats, who remain the most powerful party, are not yet ready to move back into the prime minister's office themselves.

INTERNATIONAL HERALD TRIBUNE.

More Substance, Please

Russians let Andrei Sakharov telephone his family for the first time in six years and they offer to let his wife travel to the West. They have published an interview with an American president for the first time in 24 years. These manipulations obviously are meant to make the Soviet Union look less repressive and to make its policies look more reasonable.

It is a shame that in his first chance to explain "star wars" directly to Soviet readers, President Reagan failed to get his own arms control vision straight. And it is a shame that the Russians lacked the courtesy and courage to print his answers without censorship. That it takes a summit meeting to produce even these flawed attempts at communication shows the gulf that diplomacy must bridge.

The most important feature of Mr. Reagan's Izvestia interview is that it occurred. Obviously Moscow has felt stung by American com-plaints that Mr. Gorbachev takes unfair advantage of American media without offering reciprocal access, that abuse of dissidents makes Americans skeptical of Soviet intentions and that Soviet violations of arms control agreements make new ones less appealing.

With their recent gestures, the Soviet leaders seek either to improve the climate for the summit or to avert blame for its failure. This defensiveness is all to the good and can lead to larger gains if the Reagan-Gorbachev encounter ends with an agreement to meet again next year. As Mr. Reagan emphasized in his inter-view, the relationship could also benefit from warhead stockpiles. Better questions from Izmore significant changes of Soviet policy in Afghanistan, Cambodia or the Middle East.

The Russian censors worked hard to excise almost all of Mr. Reagan's blunter criticism of

The Reagan-Gorbachev meeting approach- Soviet conduct and also the president's effort es and summit seductions are upon us. The to demonstrate his own humanity. They would not let their people bear him deplore the fact that "both of us could threaten the other with the death and the annihilation of millions and millions of each other's people." They left only his colder explanations of the Strategic Defense Initiative, buttressing the Soviet charge that he is sponsoring a new arms race in space.

On this central point, the president compounded his administration's already great confusion by saying that he would deploy "star wars" defenses only after offensive nuclear weapons are negotiated out of existence to guard against some madman elsewhere. The White House quickly corrected him, saying that he also envisioned a "transition" period of both defensive and offensive arms.

The truth is that no total defense is conceivable in this century and the administration now aims mainly to augment the deterrence of offensive weapons with a missile defense. If both sides had such defense, they would be rushing to expand rather than reduce offensive weapons. So if reductions in offense are to be negotiated now, both sides will have to amend the anti-missile treaty, distinguishing more clearly between "tests" and "deployment" and extending the required cancellation notice from six months to at least five years.

The coming summit can point toward such an accord and still let Mr. Reagan claim that research on defense will continue while Mr. Gorbachev claims to have forestalled deployvestia would have focused on that possibility. Clearer answers by Mr. Reagan would have shown that the possibility survives.

- THE NEW YORK TIMES.

Other Opinion

A Strong Mandate for Alfonsin

Sunday's elections in Argentina were a resounding vote of confidence for President Raul Alfonsin. He can dig in on the next phases of his programs knowing that his effort to create economic and political stability still commands the support of most Argentines.

Nearly complete voting returns indicate that Mr. Alfonsin's Radical Party won more than 44 percent of the vote, compared to 35 percent for the Peronists. That would give the Radicals an even larger majority in the 254-seat House of Deputies against the Peronists, who are badly divided into squabbling factions.

In the final weeks of campaigning there was concern over a possible resurgence of the political violence that has marred recent Argentine history. A series of bombings and bomb threats disrupted life enough to prompt Mr.

Alfonsin, as staunch a democrat as can be found in Latin America, to impose a state of siege throughout the country. The government believes that the bombings were part of a right-wing plot to provoke the military into a coup.

States of siege are used in Lann America to control political dissent when it spills over into anti-government violence. Too often they have also been abused by limiting peaceful and legitimate criticism. To Mr. Alfonsin's credit, his government used the state of siege only to detain a dozen suspects in the bomb plots. Otherwise electoral activity proceeded unhindered. It should now be clear, however, that the state of siege was unnecessary and must be lifted as soon as possible. The vote count is a clear sign that he does not need extraordinary measures to protect his government. He has the support of the people.

FROM OUR NOV. 7 PAGES, 75 AND 50 YEARS AGO

1910: Dog Demands Another Term WASHINGTON - Pete, the almost forgotten Roosevelt man-eating bulldog that gained no-toriety by chasing M. Jusserand, the French Ambassador, from the White House grounds, has turned up unexpectedly in his old haunts after two years of "roughing it" and made things hum. After causing a panic in the State, War and Navy Building and nearly taking a leg off several employés who tried to turn him into the street, he retired to the cellar of the Taft White House Last reports are that Pete is reposing quietly somewhere about the White House, docile as a lamb, having found a friend of other days in one of the attendants. Since the last administration Pete has been having a hard time. When he returned he found himself

discredited and most of his old friends gone.

1935: Hitler Gives Olympics Pledge

BERLIN - Comte Baillet-Latour, president of the International Olympic Committee, said that Adolf Hitler assured him [on Nov. 5] that the Olympic Games of 1936 should be handled "harmoniously, in the spirit of the Olympic idea," and not be disturbed by any political consideration. Admitting that in 1933, when Hitler came to power, the Committee faced a situation which rendered doubtful the advisability to have the games in Berlin, the Count said that he and his friends soon convinced themselves of the German government's good will to have the competitions carried out in a fair spirit. "The Committee did not ignore the boycott movement directed against having the Games in Berlin." he said. "But this movement was recognized as purely political."

The same of the sa

Better No Summit Dessert Than the Usual Fudge

WASHINGTON — Visitors to Moscow say a current theme there is that President Reagan is a manipulated cipher within his own government. Some members of Mr. Reagan's government probably think so, too, and hope to prove the point by stuffing their agenda into any communique issued jointly by the two sides at the conclusion of the summit.

A communique is utterly optional and obvi-ously unwise. There was none at the conclusion of last month's Gorbachev-Mitterrand summit. President François Mitterrand of France successfully avoided having an "arms control summit." He constantly raised issues of human rights, including lists of specific cases. This moral tone and concreteness prevented the antiseptic and anesthetizing arcana of arms control from

producing numbness, that absence of feeling that U.S. diplomats confuse with "good feeling." Mr. Mitterrand knows that communiques is-sued jointly by democratic and totalitarian leaders must be vapid, to the totalitarians' advantage. They are tissues of muzzy formulations falsely

suggesting harmony and moral symmetry.

No summit is short enough, but all summits are short. Divide the available time (in Geneva, two days) in half to allow for meticulous translations. Then subtract time for stilted niceties. Obviously, summits must be primarily ratifying occasions, unveiling work done elsewhere. Now By George F. Will

imagine the draining and flattening of language being done today by U.S. diplomats toiling to reinvent detente in a concluding communique

designed to eviscerate Reaganism.

Diplomatic boilerplate often proves that even the platitudinous can be injurious. If a joint communique asserts, contrary to reason and history, that tensions yield only to dialogue, it trivializes this century's great division between freedom and its armed enemies. What is needed is not more dialogue but less Soviet misbehavior. Larry Speakes, reflecting an inanity loose in the administration, says that Mr. Reagan's first job is to convince the Soviets that "we don't plan to run over them." Oh? Does Soviet aggression flow from insecurity, which U.S. policy has

caused and now must assuage?
Add to that loopy idea the State Department idea that "frictionless" is a synonym for "good" in the phrase "good U.S.-Soviet relations." Then add Mr. Reagan's craving for a "fresh start" in relations. Stir well and you will get a communi que designed to blur edges, bleach colors and put both sides on the same moral footing.

This is a recipe for diplomatic junk food, for mental cholesterol that clogs intellectual arteries with absurd notions, jointly affirmed, such as:

Both sides value adherence to agreements. That is rubbish, and if Mr. Reagan returns to Washington having endorsed rubbish, he will have negated his recent United Nations speech in which he denounced "numerous" Soviet violations. tions of "all" agreements of the 1970s. He will also have repealed his five-year record of objec-tions to Soviet violations of arms agreements and

the Helsinki accords concerning human rights.

Speaking of human rights, the Soviets may soon perfume the Geneva atmosphere by settling a trivial number of human rights cases. So imagine a joint communique pledging both sides, as moral equals, to work to resolve human rights. problems without "interfering" in the "internal affairs" of one another. That would mean that the Helsinki accords on human rights do not apply to the internal affairs of any country. They

protect human rights in ... Antarctica?

Were Mr. Reagan to leave Geneva enveloped in a cloud of such verbiage, he would demoralize those who for 20 years have taken his quite different words seriously. And he would be disdained by those who would have successfully manipulated him. Such Geneva words would retroactively discount his public life, and would confirm Moscow's current theme. Joint communiques generate myths of moral equivalence. In Geneva, Reaganism requires reticence.

The 'Special Relationship' Endures as Social Farce

By Joseph Kraft

WASHINGTON — What began as tragedy now carries on as farce. The fuss being made over the coming visit of the royal couple shows the enormous store that Americans still set by the British connection. But overrating Britain has done terrible damage to both countries.

The myth of British importance persists because of the peculiar social condition which locates the Ameri-The tragedy is what happened to Britain after World War IL The United States and Britain fought the war as almost equal partners in a global enterprise. The extraordinary heroism of the British people, the leader-ship of Churchill and the acumen of such experts as Maynard Keynes

great power responsibility. That assumption has proved disastrously wrong all around the world. Defaults by Britain, in fact, account for much of the foreign policy trouble experienced by the United States in the postwar period.

bred the assumption that Britain

could continue to bear the burden of

American power has long since supplanted the British fleet as the

WASHINGTON—A year ago, when Ronald Reagan won his 49-state landslide re-election,

the road looked open for quick real-

ization of the conservative policy

revolution launched in his first

term. Today the initiative in most fields remains in his hands and the

political opposition is both scat-

tered and ineffective, yet he is not

measurably closer to achieving any

of his major objectives.

Tax reform is stalemated; the

budget deficit grows obdurately un-

checked; the military buildup has been slowed; Mr. Reagan has been forced to give ground on issues from trade to South African sanc-

tions; the fate of his possibly con-flicting ambitions for both an arms

control agreement and the develop-

ment of a high-tech strategic de-fense lies in the hands of a crafty

at least severely delay, Mr. Rea-

gan's enjoyment of the fruits of his

victory? A year's experience deep-

ens my conviction that the "smart tactic" he adopted in 1984 has

turned out to be very bad strategy.
That tactic was to run for re-

election on the record of the first term and to avoid using the cam-

paign to set forth the agenda for the

second. It was a smart tactic in that

it denied the Democrats the chance

to debate the choices and forced them to find fault with a status quo

that was plainly comfortable for

most voters. It worked so well that

Mr. Reagan carried everything but the District of Columbia and his rival's home state of Minnesota.

The keynote of that campaign

virtually its only memorable line -

formula for government. The ab-

sence of content in the 1984 cam-

paign stripped his victory of any

element of policy mandate and set the stage for the backing and filling

- the genuine confusion - in the

Mr. Reagan, of all people, should have recognized the danger, for he

had profited throughout his politi-

cal career from doing exactly the opposite of what he did in 1984. He

had always been a politician of con-

viction, who campaigned on the is-

sues and used his speeches to create his own agenda. When he broke that habit in 1984, he abandoned

his own formula for success and set

the stage for this year's program-matic disappointments.

If that seems exaggerated, con-

trast the situation this fall with that

four years ago, as the first congres-sional session of Mr. Reagan's first

That session saw the enactment

of the basic building blocks of Mr.

Reagan's policy revolution: an across-the-board tax cut for indi-

viduals and corporations, made

permanent by indexing; a drastic slowing of the growth of domestic

government programs; a big trans-fer of resources from the domestic

budget to military defense.
All those measures were written

into law in the first eight months of

Mr. Reagan's tenure because they

were the programs on which he had

campaigned, and on which three dozen additional Republican sena-

tors and representatives had been

term came to a close,

first year of the second term.

It was smart politics, but a rotten

shield of independence in Latin move to prolong nuclear partnership. America; there is no surrogate when things go wrong in Nicaragua. U.S. Although Britain finally entered Europe, Mrs. Thatcher has resisted like fury French, German and Italian efforts to consolidate the Community. A social need offsets the dismal

naged to produce, months after

forced to respect them.

there had been a mandate,

with very great difficulty. A liberal doctrine of responsibility was in vogue. Elite institutions kept opening ranks to new entrants. The best universities and boarding schools maintained what amounted to quotas in favor of minorities. Even Camelot, the fairy-tale kingdom created post-humously for the Kennedy administration, affected a social purpose.

new wealth translated into prestige

versed these priorities. Acceptance of authority is its social goal. For affirmative action on behalf of minorities it has substituted the right of all to get rich. It has encouraged the flashing of money in diamonds, furs and stretch limos. And it promotes the rubbing of shoulders with the Prince and Princess of Wales at social galas.

The principal beneficiaries of these events are the new rich who have not established social prestige. They walk with kings and shake off the common touch. They dance with dukes and duchesses. They are rolled together with the best American families. And they do not even have to learn a foreign tongue or bridge a cultural gap. It is enough to pay the piper. No great harm can come of this.

but small wrongs are perpetuated. The bogus "special relationship" goes on. Britain continues to become less and less weighty in the world. It does nothing to renew its work ethic or compose class differences. It sells

its prestige to the highest bidders.

America keeps picking up commitments dropped by Britain on a piece by piece basis, but without organizing a coherent strategy that comeds enduring support at home. It fails to develop a responsible estab-lishment that combines wealth with a taste for governing. On the contrary, having failed to fuse wealth and responsibility in their own country, Americans borrow prestige from an

snistocracy they can buy.

So the "special relationship" consists of living off the aristocracy of Britain. In that sense the Anglo-American tragedy has become a farce. Nobody should be altogether happy that the farce goes on. Los Angeles Times Syndicate.

LETTERS TO THE EDITOR

President Reagan's proposal that

In his excellent opinion column "The United States Needs Open De-bate on Detents" (Oct. 24), Stephen

Bases Are Expendable By George McT. Kahin

Tell Marcos

THACA New York - Americans concerned about the Philippeness might have been reassured by President Ferdinand Marcos's indication that a presidential election may be held early in 1986. But that does nothing to mitigate the foolishness of Washington's recent decision to in-crease investment in the U.S. military bases at Clark Field and Subje Bay

That decision — to spend \$1.5 the lion to apprade the bases and retain them until at least 1491 — \$2.5 and retain the control of the control nounced last month, just days before Senator Paul Laxah traveled to Mamila to urge reforms on the Marcos government. It thus mevitably undercut Senator Laxalt's efforts. It also surely discourages the non-Communist opposition that plans to chal-lenge Mr. Marcos at the polls. Whatever Washington can do to

encourage change in the Philippines — and that capacity is severely limited — it is certainly futile to attempt to do so with one hand while doggedly holding on to the bases with the other. Thus, congressional tinkering with the relative size of the military and economic components of the rental America pays can have only a marginal political effect. The value and durability of the

American facilities are diminishing even as the Pentagon prepares 'F' pour more money into them.

First, the bases and the nuclear weapons understood to be stored at them are now within the range of Siberian-based SS-20 missiles.

Second, the overall center of gravity of U.S. naval and air missions has shifted westward from the South China Sea toward the Indian Ocean and the Middle East. A 7th Fleet carrier force has been moved to permanent station in the Indian Ocean, where major facilities capable of handling B-52s have just been completed on the island of Diego Garcia. Third, the Pentagon's assertion

that Philippine bases are vital be-cause of Soviet access to Danang and Cam Ranh Bay, in Vietnam, rings hollow. For Mr. Marcos has pledged Hanoi that he will not permit the United States to use Clark or Subic to mount an attack on Indochina.

The value of the bases is also being seriously undercut by the continuing erosion of the political ground on which they stand. Both Mr. Marcos and his opponents — Communist and non-Communist — exploit un predictable currents of Philippine nanonalism. Of most immediate danger is the Communist-led New People's Army, which, Defense Minister Juan Ponce Enrile told me, now musters some 18,000 armed men, ball of them with modern American weapons.

U.S. commanders emphasized to me that their major worry is security on the perimeter of the bases. The New People's Army lacks the power to overrun the facilities, but it has the capacity to harass them extensively and to render them largely inoperative. Only two months ago a guerrilla unit walked right through the Philippine military's outer perimeter at Su-hic Bay and camped close to the border of the U.S. Iacifity, within mortar range of an ammunition magazine. Only 600 Filipino troops are avail-

able to patrol Subic's outer perime-ter, which is more than 20 miles (more than 32 kilometers) long. In such a situation, guerrilla lead-ers could easily be tempted to exploit manionalist feelings through a confrontation with American troops.

Nor is it implausible that an American base commander might react impulsively to a perceived guerrilla threat. The bases agreement grants these commanders the unqualified right to carry out security measures outside the bases, with no stipulation about the circumstances or how far American iorces can be sent. Given the record, what should one expect President Reagan's reaction to be if shots were fired at American servicemen? So there is a real possibility that the United States could be drawn into a quagmire in the Philippines.

Clark and Subic clearly rest on uncertain political sand, and little time is left for the Pentagon to implement contingency plans for moving and decentralizing the military assets now dangerously concentrated there. Ample alternatives exist — among them Guam, Tinian, Saipan, Palau. For the time being, at least, much greater use could be made of bases now available in Australia and Singapore. The Pentagon should begin this shift now, using the funds it has so imprudently allocated for further in-

global survival to decide whether the

A Meeting of Opposites

the superpowers share research in strategic defense is a morally bold idea, putting ethical principles before ideological conflict. However, at the summit Mr. Reagan will be meeting the leader of a system that represents a backward step in the moral progress of mankind. In their "Joint Appeal to Reagan and Gorbachev" (Oct. 31), Olof Palme, Rajiv Gandhi et al use moral arguments unlikely to have much authority with Mr. Gorbachev and his establishment. Until Moscow subscribes to internationally accepted rules of civilized conduct, it would be naive to pin high hopes on a meeting between two leaders who, morally, have so little in common.

EGILS ZILE Singapore.

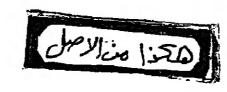

F. Cohen notes that it is a question of

policy goal is "to live peacefully with the Soviet Union as a coequal super-power," to roll back Soviet power or to destroy the Soviet system. He to destroy the Soviet system. He urges that this question be debated. It is most important that the American people see that President Reagan's long-term goal is not to live with the Soviet Union as a cocqual superpower. In April, 1982, he issued a National Security Directive which stated that U.S. policy toward the Soviet Union is a confrontational one, designed to use economic, political and reliated.

infairly to suggest that Mr. Reagan had made new policy. The difference in what Mr. Reagan said and what he meant to say is significant because he has de-

hat would make offensive nuclear

missiles obsolete. In his remarks during the inter-view, twice repeated in slight variations, Mr. Reagan suggested that he was making the elimination of the offensive weapons a condition for deploying defensive weapons.

Those remarks were extensively reported and caused consternation among administration officials aware that the president, in advance of his Nov. 19-20 summit meeting in Geneva with Mr. Gornew negotiating position on missile

Mr. Reagan repeatedly has disto use SDI as a "bargaining chip" U.S. program limited to research. With this in mind, Mr. Speakes, But according to an administra-

ment of SDI was dismissed tion official who asked not to be Tuesday by the White House identified, it was "difficult to corspokesman. Larry Speakes, as rect the record" because no one wanted to say "that the president had misspoke

Instead of directly correcting Mr. Reagan, senior White House our nuclear missiles, our offensive officials tried to make an indirect correction by issuing a series of "We would not deploy" the SDI "talking points" that said he was system, he said in the interview that using "presidential shorthand"

The president was misunder Late Tuesday, Mr. Speakes went

tion of the nuclear weapons."

Mr. Speakes said that the president had meant to use the word

beyond the prepared talking points to explain the administration's version of the "misunderstanding." He said it arose in part because Mr. Reagan wanted to avoid ad-

dressing the question of what the United States would do if missile defense technology was proffered to Moscow and refused. Asked what the United States

would do, Mr. Speakes replied: "Who knows? That's at least two scribed SDI as a defense system presidents down the road."

Even proponents of SDI acknowledge that its probable accomplishments have been often overstated by Mr. Reagan. For example, he has described the system as one that would shield civilians against nuclear missiles without acknowledging that, by itself, it is unlikely to protect against low-fly-

ing cruise missiles and bombers. Most recently, Mr. Reagan has been saying that the system would need to remain in place after nuclear missiles are climinated as protection against a "madman" bachev, appeared to be signaling a ing a nuclear missile. But SDI does not include a defense against ground-based terrorism.

White House officials have in the wowed suggestions that he wants past explained Mr. Reagan's tendency to overstate as part of his with the Russians. They want the effort to convince the American people of his "vision" of SDI. They also have said it may be part of a soon after the interview, talked larger negotiating tactic. But previabout what he called the "misun- ously, the White House has not derstanding" to the White House corrected his statements.

SCIENCE

Building Lessons Emerge From Mexico City Quake

By William Stockton

ed 7,000 people here in September has yielded important lessons in

building design and city planning. Although earthquakes register-ing 8 or more on the Richter scale have struck a few other major metropolitan centers in this century. the Mexico City disaster was the first to test the building technology widely used in major cities.

Among the conclusions drawn from the disaster, which destroyed more than 400 buildings and damaged hundreds more, are that architects, engineers and city planners must restudy geological formations beneath some cities that might greatly increase the destructive force of an earthquake.

Engineers found that asymmetrilikely to collapse in an earthquake. lower floors, with denser conditions on the floors above, caused withstand an earthquake of 6.0.

the Mexican quake is that buildings of medium height, from 5 to 20 stories, were subjected to sideways acceleration nearly six times greater than any ever experienced in Mexico. These approached the ac-celeration value of gravity, 32 feet per second, or one G in scientific

to withstand earthquakes increases exponentially with the rise in mag-nitude of the potential earthquake. William C. Stone, a structural engineer at the National Bureau of Standards in Gaithersburg, Maryland, told the American Society of Civil Engineers in Detroit last month. A building designed to more powerful than an earthquake

HE city, which sits on a 7,300-foot (2,220-meter) plateau, is ringed by mountains of volcanic origin. Rain running off the slopes deposited layer after layer of gravel, sand and clay in the basin upon basin was partly filled by a lake, which the Spaniards drained to cre-ate more land for building.

and 6 feet.

River, A second rupture occurred 26 seconds later, about 60 miles south. Seismologists at the Autonomous National University of Mexico gave the two ruptures a com-bined value of 8.1 on the Richter

There was little damage in the

bing against one another.

A building in an earthquake behaves similarly. A sideways or lateral force moving through the ground causes it to vibrate. The requency depends upon its height. method of construction and the na-

Struck once, the building's vibraabsorbed within the building. Friction between the molecules of iron in the building's steel beams, for example, absorbs energy. So do the concrete and the building's other

brate, or flex, in an earthquake, Tower, a 37-story building con-

the building comes apart. Modern high-rise buildings of 5 to 20 stories usually have a vibra-mic waves traveling from 20 miles example, absorbs energy. So do the tional frequency of two seconds. If beneath the Pacific coastline concrete, the iron bars inside the such a building is pushed sideways, reached the old lake bed in the the building will sway, taking two Valley of Mexico, the layers of seconds to make a trip to and fro.

Mexico City's Latin American striking effect. Seismic waves travel

dissipating the earthquake's energy structed in the 1950s at the core of tions will quickly die out, since the through vibrations of the structure the earthquake zone, was not damenergy that caused the vibrations is — without so much vibration that aged. Its vibrational nerical is 17 - without so much vibration that aged. Its vibrational period is 3.7

It is believed that when the seis-

at different velocities in sand, gravel and clay, and it is thought that because of this, the waves from the earthquake underwent significant transformations as they bounced between the sedimentary layers.

Tracer i fine

Some waves, striking the border between a layer of clay and sand, might have been reflected back. The reflected waves then struck oncoming waves, canceling them out, a phenomenon physicists call destructive interference.

But other reflected waves probably joined up with oncoming waves, making them stronger, in what physicists call constructive in-

Dr. Esteva Maraboto and his colleagues at the Autonomous University of Mexico believe that parts of the take bed vibrate naturally with a two-second period. The resuif was that the ground of central Mexico City and many of the buildings sitting on it resonated as waves of seismic energy struck

If two crystal glasses with the same natural vibrational frequency are placed side by side and one is struck with a spoon, both will ring. Sound waves from the struck glass travel through the air to the other glass. If the sound waves are intense at the glass's natural vibra-

tion frequency, the glass will shat-This is essentially what hap-pened in Mexico City. When the seismic waves arrived, they caused the lake bed sediments to resonate. and the sediments probably amplified some of the waves. Many

buildings began to resonate in con-cert with the ground. Had it been an earthquake in which the most intense waves lasted only a few seconds, disaster might have been averted. But the earthquake was generated by two seismic events 26 seconds apart. The most intense waves lasted particularly long, and many medium-

ITY officials, acting on the advice of university engineers, have revised the city's building code. The calculations used by building designers have been made more rigorous. The ways in which columns and floors in a building are tied

together have been changed. Of special concern were streetcorner buildings with soaring lob-bies, and hotels and office buildings with parking garages or large open spaces on the lower levels. As the shaking continued, columns in the open lobby areas failed. The upper floors of the buildings, filled with offices or hotel rooms and less flexible, increased stress on the lower floors. The tremors also im-

Many buildings had been built too close together. Some, resonat-ing with the earthquake, banged

Vertical concrete columns often failed because they were not built strongly enough. The continued shaking caused the columns to batter the concrete slab floors they supported. A common sight in the earthquake damage zone is buildings whose concrete columns failed, bringing the floor slabs down on top of one another like a

in the earthquake were government buildings, leading to accusations that building codes had been ignored because officials had been bribed. Mexicans engineers have acknowledged this possibility. Even so, Dr. Stone said, the Mexico City earthquake was so strong and the geologic circumstances were so unusual that "even buildings de-

which the city was built. When Cortez conquered the Aziecs, the

Mexico City became an urban center of 18 million people. Much of it is built on the high ground surrounding the old lake bed, but parts of the city center were built on layers of sediment with high water content, more than one and a half miles above bedrock. About 300 miles (480 kilometers)

scale, making it one of the most powerful earthquakes in history. The Cocos Plate lurched between 3

THE WORLD HEALTH ORGANIZATION

invites applications for the post of

MEDICAL OFFICER IN THE

PARASITIC DISEASES PROGRAMME

which will become vacant in August 1986

Dates: Under the supervision of the Dyedor, Parasitic Diseases Programme, the incumbent will be responsible for the inspendent and future development of the

incumbent will be responsible for the implementation and future development of the WHO programme for human intestinal porasitio infections, both protection and helimitries. This will involve international coordination and cooperation with WHO Regional Offices and national health services to stimulate programmes of intestinal helimitricisis control using a Primary Health Core approach. The incumbent will be responsible for professional and technical training in the diagnosis, epidemiology, chemotherapy and control of intestinal parasitic infections and will be expected to continue the present active programme of heaching courses as country and interregional level. The incumbent will provide specialist advice to other branches of WHO and will liase with other programmes with smiles interests, particularly the Diarrhoedi Diseases Control programmes. The administration of research grams and the updating of epidemiological information are essential parts of the programme.

Qualifications: Medical degree from a recognized University. A post-graduate degree or equivalent in trapical mediane or public health would be an asset. At least five years experience in the design and administration of research and control programmes on parastic diseases. Trapical field and laboratory experience in research and control of intestinal parastic invectors would be highly desirable. Excellent knowledge of English or French with a good working knowledge of the other.

The solary scale ranges from USSS1,746 langlet and from USSS6,035 (with dependents)

Applications are invited from candidates of either sex - applications from women are encouraged. Qualified condidates should send their detailed curriculum vitre not later than 28 February 1986 qualing PDP/86 to:

Only those condidates under serious consideration will be contacted.

Dozens of smaller ruptures occurred afterwards as the plate re-

and registered 7.5. Normally, an earthquake sends out waves of widely varying fre-

called the Cocos Plate thrusts under the land mass of Mexico. The plate moves an average of three quencies. Some waves come every few hundredths of a second, others inches (7.6 centimeters) a year, but it has often become stuck. Seismolat intervals of one-tenth of a secogists suspect that a segment of the plate between the Mexican states of ond, still others at longer intervals. Michoacan and Guerrero, where Instruments near the earthquake's epicenter recorded similar waves. But when the waves reached Mexithe Balsas River meets the Pacific Ocean, had not moved for perhaps co City two minutes later, the high a century.

The movement of the earth's frequency waves had been filtered out by the 300 miles of terrain in crust built up pressure on the immobile plate. The rupture began at 7:17 A.M. Sept. 19. The focal point between. What remained was a train of seismic waves of great intensity, arriving every two seconds. was about 30 miles from the Balsas

Ordinarily the strongest seismic waves from an earthquake last 15 seconds at most. But the intense Mexico City earthquake seismic waves lasted for nearly a minute. The strongest waves arrived in the middle and lasted nearly 50 sec-

hills around the old lake bed, where residents felt the earthquake as a slow and rhythmic shaking rather than as a rapid jiggling.

But in the lake bed, the result

was different. The long intense seismic waves, the different densities of layers of sediment, and the design of certain buildings had catastrophic results.

The reason is that buildings have natural vibration frequencies. For example, if you grasp a credit card at one end, hold it upright and tap the free end of the card, it will vibrate briefly, then the vibrations will die out. The vibrations disap-pear because of the friction of the molecules of plastic in the card rub-

ture of its foundation.

Buildings are constructed to vi-

IN BRIEF

Debris Threatens Spacecraft

WASHINGTON (NYT) — Destruction of spacecraft by antisatellite weapons of both the United States and the Soviet Union is adding to the estimated 40,000 bits of debris that already threaten gracecraft. 40,000 bits of debris that already threaten spacecraft

n earth orbit. While the volume of space within which earth satel-lites operate is vast, several U.S. and Soviet craft may

already have been damaged or destroyed in collisions with space debris, according to the journal Science.

Radar is monitoring about 5,600 objects in earth orbit, of which 72 percent are classified as debris, including used rocket boosters, shrouds, clamps and other fragments. The remaining orbiters are working or dead satellites. Not tracked, however, are tens of thousands of smaller objects, such as paint chips substantial enough, it is believed, to have produced 160 holes or craters in the Solar Max satellite.

Chinese Find Fossil Primate

BEIJING (AFP) — Chinese experts have discovered rare fossils of what may be a forerunner of man, a giant ape up to 10 million years old, the Xinhua news

The fossils, found last month in Sichuan province, belong to a species of Gigantopithecus, a giant primate from the Pleistocene era and belonging to an intermediate state of development between the great apes and primitive man, the agency said. The discovery in a cave 2,640 feet (800 meters) above sea level also included fossils from 20 species of mammals and reptiles dating up to 65 million years ago, such as mastodons and sabre-toothed tigers.

The scientists who made the discovery said that it would help the study of Chinese paleontology, of the geological history of the upper reaches of the Yangtse river and of the formation of the Yangtse gorges.

Sale of Kidneys Is Abused

PITTSBURGH (AP) — Kidneys for transplants are in such great demand that some have been sold for up to \$13,000, or more than seven times their weight in gold, according to a 10-month investigation by The Pittsburgh Press.

The newspaper found that money often determines the 5-ounce (140-gram) organ's path from donor to recipient. And money is an incentive to donors in such countries as India to put their kidneys up for sale.

"When you have commodities that could be lifesaving or prevent you from being crippled or blinded and they are scarce, you immediately face the law of the marketplace degenerating into the law of the jungle," said Dr. Roy Calne, a pioneer in kidney transplantation, who works at Cambridge University in England. Last year, while almost 10,000 Americans underwent regular dialysis while waiting for transplants, at least 300 kidneys collected in the United

GOTEBORG, Sweden (WP) - Toys that make noise, including squeaking rubber toys used by infants, are potential causes of hearing loss, Swedishresearchers warn.

"The sensitivity of children to loud sounds is virtually unknown," Dr. Alf Axelsson writes in the journal Pediatrics. Many toys have noise levels above the danger levels for adults, and the effects on children could be even more severe. He and colleagues at the University of Göteborg checked sound levels on a variety of toys, including squeeze toys, tracks and cars, toy weapons and firecrackers.

The squeaking squeeze toys emitted up to 108 decibels measured at about 4 inches (10 centimeters). "At normal distance, the sound pressure appears to be within safe limits," they write. "However, there is a clear risk for noise-induced hearing loss if the toy is used close to the ear of the child."

New Light on Insomnia

TROMSO, Norway (Reuters) -- Scientists in this arctic city, where midwinter darkness affects the sleeping habits of up to one-quarter of the population, say they may have unlocked some of the secrets of insomnia and pointed the way to a cure.

Other research suggests that the hormone melatonin plays a vital role in inducing sleep, but Thormar Hansen, a biochemist who operates a "sleep clinic" here, believes his team may be close to being able to alter the human "body-clock" to eliminate sleepless

Dr. Hansen said that large doses of bright light help Dr. riansen said that large doses of bright light help to produce melatonin, secreted by a gland near the brain. He said there was strong evidence to show that sleeping patterns could be altered by adjusting the time of day melatonin was produced. Research showed maximum secretion of the hormone was at 2 A.M., while the brain began producing it at about 11 P.M., when most people are falling asleep.

Longevity Factors Isolated

BELIING (AP) - A study of China's centenarians has determined common longevity factors: a low-fat, high-fiber diet and a moderate climate in mountainous

areas, a press report said.

Most of the 3,765 centenarians discovered in the 1982 national census live in remote, ethnic regions 1982 national census live in remote, etimic regions such as Tibet and Xinjiang, the People's Daily said.
Two doctors from Hubei province told a symposium in Nanning recently that 70.5 percent of the centenarians are women. Their study found that most have a low-fat, low-animal protein, high-fiber diet, based on refined and coarse grain. "They enjoy eating beans and green vegetables and their calories are mainly obtained from carbohydrates," the report said.

INTERNATIONAL POSITIONS

SAUDI ARABIA

The Ministry of Planning of the Kingdom of Saudi Arabia has the following openings for qualified candidates in the Sectoral Planning Division:

- Sectoral Development Economist Agricultural Economist
- Water Resources Development Planner Physical Infrastructure Planner
- Transport Planner
- Industrial Economist
- Training Development Planner Health Planner Social Development Planner

MINIMUM REQUIREMENTS: All condidates should have doctoral degree in related fields with five years or more direct professioanal experience, or master degree with ten years experience. Preferences are given to candidates who are established professionals, with national level planning and government service experience, particularly in developing countries or international organizations, Knowledge of Arabic is a plus.

CONDITIONS OF SERVICES: The successful candidates will be located in Riyadh. Salary depends on qualifications and experience. Others benefits include housing, education and maintenance allowances, free use of a car or transportation allowance paid leave of 45 days a year, and economy class return tickets

Interested candidates should send detailed resume with salary history, expectations, names of references, and availability to:

Ministry of Planning, P.O. Box 358, Riyadh 11182, Saudi Arabia.

The Assistant Deputy Minister for Sectoral Planning,

Please mark the enrelope:
"Sectoral Planning Professionals."
Closing date for applications: November 22, 1985.

International Financing Organization (United Nations) located in Rome (Italy) seeks fill position of Assistant Secretary Governing Body Affairs.

Under general supervision of the Secretary, the incumbent will assist in the planning and conducting of all official meetings,

- direction and coordination of meetings documentation. drafting and presentation of management statements to governing bodies, meetings agenda, minutes and other related documentation.
- study and follow-up of all aspects of meetings proceed-

Candidates should have an advanced degree in social sciences or law and additional qualifications in international relations. Seven years progressive experience in management of development programmes and participation in meetings of legislative bodies, Proven managerial and organizational capabilities. Mother tangue English and excellent drafting skills. Knowledge of Arabic, French or Spanish desirable.

Depending on experience and qualifications net base salary per annum will range from US\$41.308.32 with dependents, and US\$30.274.93 to US\$38.101.37 without dependents. Cost of living allowance subject to change according to United Nations Common System will range per annum from US\$2.868.20 to US\$3.547.00 with dependents, and US\$2.663.20 to US\$3.271.60 without dependents.

Initial contract is for two years. Deadline for applications is 31 January 1986.

Send applications in first instance to: Box 212, the International Herald Tribune 55, Via della Mercede, 00187 Rome, Italy.

SUPPLY AND TRANSPORT OFFICER

United Nations Agency operating in the Middle East seeks Supply and Transport Officers for its Field Offices in Amman (Jordan) and Gaza.

Condidates may also be considered for similar positions expected to be vacant elsewhere (Damascus and Jerusalem) in the Agency's area of operations during 1986.

Applicants should have University degree in business administration or related field and additional course work or training in supply and transport management. Excellent command of spoken and written English is essential. ive experience, preferably at international level, is required in supply and transport management including purchasing, supply planning, whousing, stock accounting and transport fleet responsibilities. Arabic ledge would be desirable.

Incumbent will supervise operation and maintenance of transport fleet and the procurement, receipt, storage, issue and distribution of supplies and equipment required to provide services to large refugee population.

Salary and allowances range from U.S. \$35,000 (single) and from U.S. \$38,000 (with dependents) tax free per annum, plus fringe benefits. Qualified candidates should send detailed curriculum vitoe and photograph as soon as possible quoting reference VN/12/85 (A) to:

Head, Staffing and Training Office UNRWA Headquarters Vienna International Center P.O. Box 700

PERSONNEL WANTED

A-1400 Vienna, Austria.

- Following personnel required to work 28/28 in Middle East preferably UK/ Australian citizens:
- 4 Toolpushers 5-10 years experience jack-up
- 2 Drillers 10 years experience ● 2 Electricions "SCR"
- 2 Mechanics
- 2 Rig movers 2 Barge engineers

Please send full C.V. to: Box No. 034168. IHT, 63 Long Acre, WC2E 9JH LONDON

FIELD SERVICE ENGINEER

MOTOROLA, a worldwide leader in communications products offers an outstanding opportunity for an experienced service engineer with a solid background in electronics and microprocessors and the desire to travel (over 80%) out of Europe, (mainly North and Central Africa).

A minimum of 5 years experience in the repair, maintenance and

installation of a wide range of communications equipment is a must. We offer a very attractive travel/R + R plan, and a competitive salary (26 - 32K dollars US). Send your complete C.V. and detailed work experience to the Personnel Dept., MOTOROLA S.A., 14 allé du Cantal, Z.I. de la Petite Montagne-Sud, 91020 Evry.

Capital Gains: Guidelines For Foreign **Purchasers**

By Robert C. Siner

WASHINGTON — Foreign investors in U.S. real property are now subject to a federal withholding tax on any gains realized when they sell that property.

Amendments to the Foreign Investment in Real Property Tax Act (FIRPTA) provided that, as of Jan. 1, 1985, gains from any sale of a U.S. real property interest by a nonresident foreign individual, partnership or cosporation would be subject to withholding of either 10 percent of the selling price or the seller's maximum tax liability, whichever is less. This is withheld from the payment by the purchaser at the time of sale.

er at the time of sale. The actual tax liability will be 20 percent of

• For sales of nonpublicly traded stock where an affidavit has been submitted that the corporation is not a U.S. real-propertyholding corporation.

Under the terms of the act, real property is defined as an interest in real estate, buildings, other permanent structures, structural com-ponents of buildings, equipment used in farming forestry or mining, equipment used to improve real property, furniture used in lodging facilities and property used to fornish office space. Interests in real property include direct ownership and ownership of stock in a nonpublicly traded corporation holding U.S. real property.

real property.

Before passage of FIRPTA in 1980, non-resident foreign investors in U.S. real estate were not subject to capital-gains taxes on real estate unless they were "engaged in trade or business in the United States" or the gains were "effectively connected," with that business. Resident aliens and those foreign investors deemed to be engaged in a U.S. trade or business paid regular U.S. taxes. The rule for resident aliens and foreigners engaged in U.S. business remains unchanged. business remains unchanged.

Foreign investors not engaged in U.S. business may elect to be taxed as though they were. To take this option, the investor must file a statement to this effect with the tax will take effect. This can be of advantage because real estate income, such as rent, will then be taxed on a net basis. This means that the foreign investor can claim deductions for depreciation, interest payments and operating expenses and be taxed on a progressive scale. The real estate income of foreign investors not engaged in U.S. business is taxed on (Continued on Next Page)

Blessing of the hounds at Derby Meadows, Manassas, Virginia.

High Stakes in the Hunt Country

By Ann Mariano

MIDDLEBURG, Virginia — Here among the undulating green hills and pastures of north-em Virginia, where even the teddy bears in a village shop wear fox-hunting garb, luxurious, fairy-tale estates are the rule and the inhabitants are the wealthy and powerful:

Standard features on the sprawling properties are stables, barns and riding rings, since for hunting, racing and breeding horses are passions with many who live here and many who come looking for estates to buy or rent.

The Orange County Hunt, named for Orange County, New York, where it began, takes place in this area and is considered by some to be one

of the world's most exclusive hunts.

In tiny Middleburg, fashionable center of the
1,100 square miles (2,840 square kilometers) in Fauquier and Loudonn countries that make up the funt country, the rich landowners mingle,

often unnoticed, with crowds of tourists.
Visitors have included Queen Elizabeth and
Prince Philip, who had lunch with Paul Mellon,
one of the world's richest men, on his 1,000-acre (405-hectare) estate at Little Oak Springs. American presidents since George Washing-

ton bave visited or lived here for short periods. John F. Kennedy first, rented a country home and later built his own, naming it Wexford: Nancy and Ronald Reagan rented Wexford, which the Kennedys no longer own, for two months during the 1980 presidential campaign.

Jack Kent Cooke, the owner of the Washington Redskins football team and New York's elegant old Chrysler Building, has a home here, as do retired U.S. Ambassadors W. Averell John W. Warner, Republican of Virginia, and Katharine Graham, publisher of The Washing-

The hunt country, a term longtime residents scornfully say was made up by a real estate agent but one that has stuck nevertheless, is an hour's drive from Washington. It is even nearer Dulles International Airport, an important consideration for jet-setters and corporate execu-

tives who travel around the world for business more expensive - \$3.6 million. Its sprawling.

Several elegant and historic estates are on the market now. Forrest Edward Mars Jr., a reclulist of America's 400 wealthiest people, wants to sell Marland, his 217-acre estate.

Long Branch, a historic mansion on property purchased by a Virginia pioneer from Lord Fairfax in 1720, is for sale. Big Spring Farm, a 483-acre estate with a mile of frontage on the Potomac River, and Newstead Farm, which has

a manor house built in the 1800s, are available. Marland, priced at \$3 million, has an 8,630-square-foot (799-square-meter) manor house built in 1933. It contains 10 rooms, plus a servant's wing, dressing rooms, an attic with a saona and a basement with a wine cellar. The property is equipped with a swimming pool, kennels and eight tenant houses for estate em-ployees, as well as barns and other facilities for

The estate commands a "spectacular" view of Virginia's Blue Ridge Mountains, said Phillip S. homas, a Middleburg real estate broker.

The fox-hunting country has a long history, and Long Branch, named for a spring-fed stream that runs through the estate, is one of its most famous properties. The three-story brick mansion was designed by Benjamin H. Latrobe, who also helped design the U.S. Capitol and the White House. One well-known feature of the house is a stairway that spirals from the large entrance hall to the top floor.

Like most estates in the hunt country, the 142-acre Long Branch property is equipped with barns and stables. Nearly all the land is in the bluegrass, making the area one of the finest \$1.3 million, and a sales brochure notes that the

annual property taxes come to \$2,414. Big Spring Farm, priced at \$2.58 million, has horse and cattle facilities, a tennis court, swimming pool and a 3,000-square-foot, frame-and-stone house built in the 1940s.

Newstead Farm is higger, with 514 acres, at

three-story manar house is adorned by formal gardens. The estate has a swimming pool, green house and sw tenant houses, his stables and sive millionaire whose \$385-million fortune large barns, with a total of 74 stalls, and its carned a place for him on the Forbes magazine bluegrass pastures have produced 35 winning race horses, according to Mr. Thomas. The 1984 property tax assessment was \$11,447.

In a lower price range, \$1.5 million will buy Chilton, a 67-acre estate with a 15-room fieldstone house, swimming pool and horse facilities. The house, which was built after World War I, is not old by the standards of the hunt country. where many of the old manor houses date from the 1800s, said Stuart Knower, a real estate

For years, the hunt country has attracted Hollywood celebrities. Fred Asiaire often visited his sister's estate and Errol Flynn went on fox and estates. hunts here. From the newer generation of stars, Robert Davali bought Butcher's Run, a small estate, earlier this year, and Sylvester Stallone, star of the "Rambo" films, is reported to be looking for a house in the area.

The late television personality Arthur Godfrey commuted for 30 years from his New York Rudolf Nureyey, who owns and rents out a 415office and apartment to Beacon Hill, a 1,967- acre estate with a brick house and other buildacre farm near the Loudoun County town of ings. The rental fee was not revealed.

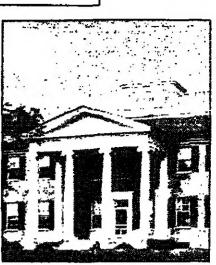

Leesburg, A Saudi Arabian prince bought the farm in 1977. His attorney said at the time that the prince would keep the farm intact.

Two months ago, a group of real estate developers and investors, including former Secretary of State Alexander M. Haig Jr., signed a purchase contract for the property and revealed plans to build between 400 and 500 luxury homes on it, plus a health club and a private golf

Some estates are available for rental, at rates

ranging from \$2,000 to \$5,000 a month for the houses. Mr. Knower said. The land usually is rented for a much lower figure, typically around \$25 per acre annually.

One of the best-known landlords is the dancer

European Designers: America's Latest Love Affair

By Jean Bond Rafferty

NEW YORK - New York has always been a melting pot of inter-national lifestyles, but the recent wave of distinctly upper-crust immigrants — more Park Avenue than Ellis Island — has put a new veneer of sophistication on American interior design.

"Europeans, used to living in grand luxe in Europe, have grown up with beautiful objects and have a better understanding of them," said Wendy Moonan, the design editor of Town and Country.

"They lean towards French fur-niture, Italian gilded commodes and even Venetian painted furniture. They're not afraid of whimsy. They possess more paintings, more Chinese porcelain, Aubusson carpets, needlepoint cushions and silver epergnes. The Europeans are not afraid to show it all off. The key word is opulence." she said.

Two styles seem to be competing for supremacy in the brown-stone belt: English country house and the Style Rothschild. Both ascribe to the anti-minimalist, more is more

At the same time, there is an increasing interest in contemporary European designers, Although European designers. Although "chiniz, ruffles and bows, comfort-like a much grander version of the these trends seem contradictory, able and cozy and very, very popureal thing. "The light and climate in

to be eclectic. The living room may be a paean to the 19th century, but the kitchen and bathrooms are usually firmly modern.

And in a country where virtually all decoration is done by professionals, what better demonstrates the genius of an artistic eye than distinct periods, the contemporary

"One of the basic differences in decorating here is that 90 percent of Americans have nothing to start with," said Vincent Fourcade, a French-born decorator. His interpretations of Napoleon III decors instigated the fashion for the florid opulence of the Sivie Rothschild.

"The reason I use so many print-ed labrics on the walls is that I hate modern pictures," said Mr. Four-cade. He said that now that French furniture prices are prohibitively expensive, 19th-century Russian furniture is in. "Its pale woods and slightly different shapes make it

Mario Buatta, an American decorator and a premier exponent of the English look, described it as

Within walking distance of downtown Stamford.

He attributed its success to the influence of England's Colefax and Fowler and the late Laura Ashley. "Europeans have lived in their

houses for seven or eight genera-tions and have a lot of furniture left over." Mr. Buatta said. "Americans move house seven or eight times in one lifetime and each time they start afresh. When Americans make their fortunes, they don't want to show that they were ever poor. They start contemporary, but move towards traditional when they discover that is how the estab-

lishment lives." The decorator Anne Eisenhower, who says her style ranges from high-tech to Georgian design, has a considerable foreign clientele, including Japanese, Indians, Span-

iards and South Americans. She finds less difference in taste than in patience between her foreign and American clients. "Americans are willing to wait nine months for a carpet," she said, "but asking foreigners to wait four months for wallpaper from Italy is asking the world."

Nina Campbell, an English dec-orator, said that Americans really

Suite Floor Plan

they are explained by the fact that lar" with both Americans and for-Americans have never been afraid eigners.

New York are very different to En-gland," she noted. "When you're fainting with heat half the year, you won't want woolly fabrics on the

She called curtains the linchpin of the English style and said that she uses French chintz in the United States, calling it more sophisticated than an English fabric.

"I think Americans want to think they like the English look, but they can't cope with our shabbiness," she said.

Manuel Canovas, a French fabric designer, said that the influence of status decoration magazines has blurred the differences in American and European tastes. "A fabric that goes well in Paris, will do so in New York and Rome," he said. "But Americans are much more open to new designs. Some of my more unusual designs I only sell in the United States."

This American readiness to accept new ideas mixed with European ingenuity and savoir faire is conbetween European design and the

American market. Andrée Putman of France, known for her designs for New York's Paladium nightclub, Morgan's Hotel and the new Barney's store for women which will be opened in January, said, "In the United States, the hands no longer know how to do these things." She, like other designers, has ev-

erything made at home and shipped to New York The French interior architect Ronald Cecil Sportes, who designed the 22-floor headquarters of L'Oreal's American company Cos-mair on Fifth Avenue, said, "All the office furniture sent from Eu-

rope including freight, tax, customs and installation was 50 percent cheaper than if we had bought it in the United States." Mr. Sportes's lamps, which he designed for the living quarters of President François Mitterrand at the Elysèe Palace, are selling well in the United States.

"Manhattan real estate and construction are the most expensive in the world," Mr. Sportes said. "I had to transform my European conceptions. In Europe you can construct for the year 2000. New York is in total mutation. Buildings are destroyed after 10 years. Investments have to take this progression

Another major difference, he said, is what he terms the "show business" method of renting or selling deluxe market office space.
"Money or function is never mentioned. They speak of the architect so or a Monet. He is a star. The building is sold on a presentation of his work as living history, and if you want to be part of it, you'd better be there," he said.

The insistence on the personality of the designer may be startling at first to French designers, long ig-nored at home, but they quickly realize the benefits. "We're welcomed like kings,"

said Jean-Michel Wilmotte, anothwasn't friendly. er of the Elysée Palace designers who is designing luxury bathrooms for a U.S. manufacturer.

rated it with the help of Pasquale car to work, which is about an bour Varzana of West Hollywood. "I away. "He used to drive himself like the whole feeling of the house into downtown I.A., but about five now," she said, "It's so much nic-

bles and a grand piano to help fill up the immease living room. Two fishtail palm trees reach from the floor to the skylights 25 feet (7.6 meters) above. A bridgeway across the living room at the second-story level connects the master bedroom

The decorator covered some of the teak walls with hand-blocked wallpaper and some of the teak floors with sculptured carpet to make the house seem warmer and easier to maintain. "It seems terrible to cover teak, but keeping it up was a lot of work," Mrs. Jefferies

For the same reason, she changed the kitchen tile to granite "because there is no grout, and Designed by architect Fred M. granite doesn't show any dirt." She completed in 1978, is a combina- takes its toll on everything inside." When she had the house redeco-

Capital Gains Guidelines

(Continued From Previous Page) a gross basis. No deductions are allowed and the tax rate is set at a

The rules for establishing whether a foreign individual, partnership or corporation has a U.S. trade or business are not precise. But generally, the more substantial the investment, the greater the involvement in business activity, or, in the case of rental property, the shorter the leases and the more numerous the tenants, the greater the likelihood that a foreign investor will be held to be engaged in business in the United States. On the other hand, personal use of property as a residence or rental of unimproved

land does not usually constitute in-volvement in a U.S. business. However, in 1980, Congress de-cided that the tax rules gave foreign speculators in U.S. real estate, es-pecially farm land, an undue advantage over Americans. The result was FIRPTA, which levied a capital-gains tax on all foreign inves-tors in U.S. real property.

complex and controversial set of Group.

• 12% return.

reporting requirements, which, among other things, would have required nominees to disclose the names of their foreign principals.

Because of their complexity, imposition of these rules was contin-nally delayed until Congress re-pealed them in 1984 and replaced them with a winholding tax. However, the IRS was ordered to study the workings of the amended FIRPTA and institute new reporting requirements if necessary.

An IRS spokesman, Robert Kobel, said that the revenue service was in "a wait-and-see status" and had no plans to draw up new reporting rules.

Besides the FIRPTA rules, taxes on income and capital gains from real estate may be affected by the tax treaties that the United States has with more than 30 nations, Investors claiming total or partial exemption under these or other tax laws must get approval in writing from the IRS Foreign Operations tors in U.S. real property.

FIRPTA did not include withholding but instead mandated a marked attn: FIRPTA Special

A SPECIAL REPORT ON REAL ESTATE

Nantucket: Lessons in Keeping Up Appearances

By Edich Cohen

NANTUCKET, Massachuseus in the antique-filled draing room of the Jared Coffin House, an 1845 mansion built by a whating fortune and now serving as an inn, the guests' conversation turns to what President Ronald Reagan's tax proposals, limiting deductions on mortgage interest payments for second homes, could mean for owners of vacation homes.

Later that evening at Bookworks, one of the few shops open on a street of gray clapboard cot-tages, a clerk chats with a customer about completing the paperwork for buying a house. And at the Brotherhood of Thieres, a sociable pub, an architect and his client review renovation plans.

It is difficult to spend much time on Nantucket, an island 30 miles (48 kilometers) off the Massachusetts coast, without falling into a conversation about the acquisition. disposition or transformation of its 50 square miles (129 square kilometers) of real estate.

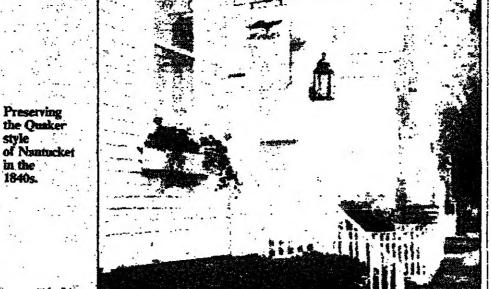

The population, which swells from 6,000 year-round residents to more than 40,000 in the summer, seems to be in the grip of real estate

Along with growth have come the usual problems of traffic commore than 40,000 in the summer, gestion, air pollution, crime and drugs. To confront these issues,

Not long ago Nanuncket was a sleepy summering spot for genera-tions of New Englanders. Many grew up to buy vacation property that then became a full-time or retirement home.

only lived here 26 years." By the mid-1960s, however, after a 100-year economic trough tour-ists discovered the island. Now more than 700,000 visitors flock to Nantucket annually. With them has come a desire to own property that has worried some islanders.

Bruce Posner, a long-time visitor, said, "People once owned homes, and now they own real es-

sense of haven without squelching

its economic benefits. Nantucketers increasingly are furn-ing to a tradition of defending their uniqueness, on Yankee ingenuity in devising legal strategies and on New England grass-roots activism, which has produced the Alliance Against Drugs on Nantucket.

that knows its roots. A resident Planning Commission, tourism who cannot answer the question of an "off-islander" explains, "I've only lived here 26 years" identity intact.

In fact, in 1955 the island had fought for and won official status as a "historic district," ensuring that any changes would be consis-tent with the subdued nature of its Quaker origins and the pervading style of the 1840s.

By the early 1970s, however, construction was picking up, and legis-lation was proposed to ensure the preservation of the wild areas, as

H. Flint Ranney, a Realtor with Denby Real Estate, said that while the hill did not pass, it hung in the air long enough to spur fervent sub-division and building. By 1975, the planning commission was estab-

In recent years, the 215-hour boat ride from the mainland competes with flights into the island's arport. Three cruise ships visit during the season, which stretches ten-uously from the Daffodil Festival

through the Christmas Stroll, Corporate meetings are big in autumn. To earn some of the \$45 million the tourists pump into the economy, islanders rent out their homes in the summer and move in with relatives, paying rents them-

selves.

Scallop fishing is a \$2-million-a-year industry, while the construction business brings in \$20 million

Real estate has appreciated as much as 120 percent in the past five years, Mr. Ranney estimates. And Mr. Klein said that sales in dollar

brokers and an owner of Jordan & Jenkins, put the median house price at about \$275,000. A "dump in town" could go for \$350,000. town" could go for \$350,000. and a nice place in rown could fetch \$950,000, she said. Lots start at \$60,000, She added, "We're not being invaded by poor people." The number of permits for new

dwellings has also soared, accord-ing to Carl Borchert, the island's building inspector. In 1977, 94 were issued. A cap of 80 a year was imposed from 1980 to 1986, except for year-round residences. But because of exemptions and plans already under way, he expects to isaue 300 permits for 1985.

The island, densely populated at the harbor, has tiny village-like clusters, each with its own name, scattered among farms, cranberry bogs and the wide scrubby moors that are prey to developers.

In 1963, the Nampeket Conservation Foundation, a private group, began buying up land to be kept wild and held in trust for the public. Together with the Audubon Society and other naturalist

terms have climbed 140 percent in The boom is raising sobering four years, to about \$120 million. questions about how to preserve well as those on neighboring Marthe island's natural beauty and tha's Vineyard and Cape Cod. Lucille A. Jordan, another of the groups, it owns about 6,000 acres, island's 300 licensed real estate or about 16 percent of the land.

Mountain Retreats: Where the 'Old West' Survives

By Lou Chapman

DENVER - Ask someone what comes to mind when you say luxurious Colorado real estate, and they are likely to say, "A ski chalet in Aspen" or "A house by Frank Lloyd Wright in the foothills."

But there is another type of real estate awaiting the sophisticated buyer whose wanderlust might turn westward, a type of home and a vision of land that people leave places like Aspen to find — the mountain ranch.

Lying in the valleys of some of Colorado's most beamiful mountain ranges, such real estate includes working cattle ranches, Arabian horse ranches and hundreds of unfarmed, ungrazed private acres of land. This land provides not only serenity and solitude for its owners but also is used for the private hunting of elk and deer and for flyfishing for brown and rainbow

Many of these ranches, although tucked away in Colorado's lesstraveled and less-familiar reaches, include homes as modern and luxurious as those in New York City or

We still have gunlights down here occasionally," said Jack Carr, whose Arabian horse ranch sits in a secluded valley 160 miles (258 kilometers) south and slightly west of Denver. "It's just got a mystical beauty about it that's hard to describe. And it certainly is Old

On the other hand, the Carr house, a two-story home of 3,000 square feet, (278 square meters) was designed by the architect Elliot Noyes and features a 280-squarefoot kitchen with cherry and Koana wood cabinetry handcrafted by a local woodworker, built-in refrigerator and adjacent built-in freezer, three pantries, range, oven, grill, wet bar and lots of counter

space.
It is a modern home in an accessible but rugged wilderness. Mr. Carr bought his ranch in 1981. He had planned to retire then and raise his horses there, but he had to return to Connecticut to manage the Matcon Corp., a com-pany he founded and from which

he thought he had retired. As a result, the Carr ranch is on the market for \$1.2 million, which is high by Colorado standards for a house on 479 acres (193.5 hectares)

"Our view of it is that it's clean and quiet and stress-free," Mr. Carr said. "It gives the animals a sense of freedom and serenity, and

Prices Leveling Off at Top of New York Market

By Leslie Whitaker NEW YORK — New York City's residential real estate is among the most expensive in the United States. But recent concern about potential changes in the tax code and about the strong dollar have weakened domestic and foreign demand for luxury housing. the most rapidly expanding sector of Manhattan's market.

Consequently, brokers expect the year to end on an unusually flat note and next year's price rise to be held to less than 15 percent. "Prices have been leveling off."

said Henry Robbins, of Yale Robbins, a New York real estate con-

sulting firm.

He said that "the market can only absorb so much," citing the 9,400 apartments that were built this year and the 13,700 units that are expected to reach the market next year.

But anticipated investment re-turns of about 7 percent in 1985 and double that next year are low only in comparison to the New York market's history. Condominium and cooperative owners realized appreciation rates of 18 percent or higher during seven of the last eight years, including a 66-per-cent price leap in 1978. Last year, the average value of condominiums and cooperatives climbed 28 per-

The Upper West Side, a trendy stretch west of Broadway running from the 70s up to 96th Street, is undergoing a more subtle renaissance. Many of the older, greasy effect and discount stores. coffee shops and discount stores that lined Broadway have given way to stylish boutiques. Apartments here generally cost about \$50,000 less than similar places on the East Side.

- LESLIE WHITAKER

Toronto Going In for Luxury Living

By John Allemang

TORONTO - Until recently, huxury was a rare commodity in Toronto. The Anglo-Saxons who settled the city on the shores of Lake Ontario brought with them a work ethic that quickly made To-ronto the financial capital of Canada. But they also brought a puritanical streak that put work before pleasure and earned the city the name Toronto the Good.

Toronto is still a bustling, businesslike city that preserves many of the legacies of the 19th century. such as a low crime rate and tidy. tree-lined streets. But it has also learned that a little luxury is not such a dangerous thing.

Credit for this change is usually given to the influx of immigrants from Europe. Asia and South America over the last few decades. Toronto is now one of the most cosmopolitan cities in the world. with a huge social mix in its population of three million.

As a result, the traditions handed down from the reign of Queen Victoria are now open to question and the making of money is no longer an end in itself.

Spending money in Toronto has become much easier and much more self-centered. The clearest example of this is in the city's housing, which has gone from dull and dependable to spectacular within just a few years.

Luxury accommodation abounds. Many older properties are being gutted and renovated to bring more light into bigger rooms. Jacuzzi-equipped spas and solari-ums are compulsory in the new homes being built at a in the city's outlying suburbs. Even the cheapest apartment in the latest high-rise tower finds some way to call itself

But the most impressive luxury housing is the condominium develcoment that has taken over and revived much of downtown Toronto. It is not the most expensive form of housing in the city - there are plenty of estates selling for miltions of dollars - but it is the most secure and maintenance-free.

Recause the location of these condominiums is more central than almost any other housing in the city, they are attractive to those who want to do business quickly, as well as to those who want to find high-quality shopping, dining and

properties for foreign buyers, who have accounted for 70 percent of sales in the 72-unit building.

While many of the luxury buildings in the city are aimed at local middle-aged couples who want to move out of a big house after their children have left home, the Residences seek a wider andience.

They are located on the edge of Lake Ontario and form the centersiece of a redevelopment known as Harbourfront that is quickly transforming an industrial port into a residential district.

A 1927 warehouse forms the basis of the condominiums, which occupy four newly built floors on top of nine floors of expensive shops and offices. The building, known as Queen's Quay Terminal, was given an award of merit by the Canadian Housing Design Council in recog-nition of the renovation undertaken by the developers, Olympia and York Ltd., at a cost of 60 million Canadian dollars (\$44 mil-

Overseas Money Showing Renewed Interest in U.S.

By EDWARD ROHRBACH

WALL STREET WATCH

RLEANS, Massachusetts — Cape Cod juts out into the Atlantic here like a sharp elbow pointed toward Europe. It's a fitting place for John P. Dessauer to live and muse about world financial markets in his biweekly advisory letter, Dessauer's Journal.

Upwards of \$100 billion is invested on Wall Street by non-Americans and Mr. Dessauer, who spent 3½ years in Zurich as Citicorp's senior European investment officer, believes they are poised again to begin buying U.S. stocks.

"I think Wall Street looks extremely attractive now to foreign

investors," he said. Foreigners shunned U.S. equities in 1984 after a long love affair that made them net buyers on Wall Street each year since 1972, he noted, while Americans were consistent net sellers of their own companies' stock over the

Dessauer disputes the notion that Europeans are not market leaders.

12-year period. He added that 1985 has not seen significant participation by foreigners, but in prior years "Wall Street tended to go up or go down, depending on the inflow or outflow of funds from overseas." With the Dow average at record highs, he observed, American investors are showing more optimism toward Wall Street than at any time in the last 10 years.

Thus, if foreigners return to Wall Street, he sees a "powerful force that could have a dramatic impact" suddenly developing. "In 1982 we had a glimpse of what can happen when foreign and American investors are on the buy side together," he said. "It was record foreign buying that triggered the great bull market that August."

Mr. Dessauer likes to look at the U.S. market through the eyes of the Swiss. From this perspective, with the Dow industrial average converted into Swiss francs, he said the risk in U.S. stocks is "far less than when the dollar peaked last March."

T HAT'S MORE, his own index of major world stock exchanges, equally weighted to show relative sentiment, shows that Wall Street is selling at the deepest discount to

"U.S. stocks look undervalued, and my guess is that sometime soon foreign investors could begin taking profits in their own markets and move into Wall Street," he said.

Triggering a rush into New York-listed stocks from overseas, he believes, will be good news about corporate profits on this side of the Atlantic. He predicts a 20-percent earnings spurt in 1986, the result of continued strong consumer demand that by then will be focused more on home-produced products because of the

He cited the example of the Frankfurt Stock Exchange, where the FAZ Aktien index jumped 52 percent in the first 10 months of 1985. This surge, he said, was "largely inspired" by a 37-percent gain in West German corporate profits over the period.

"A 20-percent expansion in earnings by U.S. companies — which really isn't so much — could easily translate into a 25-percent rise in the Dow," he said. "That would send it up to the 1700-1800 level"

1,700-1,800 level,"

While many Americans, particularly the big institutions, tend to dismiss foreigners as "laggards, not leaders," and insist that "the tail cannot wag the dog," Mr. Dessauer disagrees. He thinks foreigners are simply more astute.

"Typically. Americans look at Wall Street and nothing else," ne said. "But for reasons of financial survival, foreigners have had (Communed on Page 17, Col. 5)

Philips Says Net Fell 27%

Despite Fall, It Sets U.S. Listing

AMSTERDAM — Philips NV, Europe's biggest electronics com-pany, said Wednesday that its third quarter net profit fell 27 percent, to 175 million guilders (about \$59 million) from 241 guilders a year earlier. Net profit for the first nine months dropped 22 percent, to 611 million guilders from 785 million a year earlier.

Despite the profit drop, the com-pany announced Wednesday that it would seek to list its shares on U.S. stock markets.

Net sales in the third quarter rose about 4 percent, to 13.66 bil-lion guilders from 13.16 guilders a year earlier, Nine-month net sales rose about 10 percent, to 41.02 billion guilders from 37.33 billion

The company's vice chairman, Johannes Zantman, said the company no longer expected to match the 1.11-billion-guilder net profit recorded in the whole of 1984. The company cited, among other things, a sharp drop in earnings at its North American subsidiary in the third quarter. "We expect U.S. results to recover in the final quarter but no longer expect to reach 1984 levels this year," he added.

Mr. Zantman said that Philips' Signetics subsidiary had performed poorly in the U.S. semiconductor market, where many companies have struggled because of intense competition from Japanese companies and from falling prices.

However, he also announced that Philips had applied to U.S. authorities to offer shares in the company on U.S. stock markets. "Despite our recent disappointing results in North America, we believe the bourse [stock market] cli-mate is ripe for this offer." Mr.

The amount of the offering will equal about 4 percent of the existna number of nominal 10-guilder Philips shares outstanding, currently 215 million, Mr. Zantman

Philips shares closed higher Wednesday in Amsterdam despite the group's announcement of the Savings and Loan Insurance Corp. The FSLIC, whose cash reserves earnings drop. The stock closed at 52.80 guilders, up from 48.80 guilders. Tuesday. Dealers said the have diminished substantially, market had anticipated a much larger drop in profits.

Philips said sales and income developed favorably in Europe in the provement in operating profit outside the United States was insulficient to compensate for the drop in results in the United States.

ITC Meeting **Ends Without** Tin Solution

LONDON — The International Tin Council adjourned Wednesday an emergency meeting here without making any headway in its attempt to end the chaos in the world's tin

industry.

Delegates said that the ITC members will reconvene Thursday and again next week in an effort to find enough funds from their 16 financial backers to resolve the cri-

The purpose of Thursday's meeting is to finish Wednesday's discussions and issue a statement giving what delegates called "general assurances" regarding the ITC's ef-forts to end the crisis that began two weeks ago when the conneil rain out of funds to continue propping up world tin prices.

"The only thing that makes meeting tomorrow worthwhile is that the ITC's member govern-ments are willing to bonor their obligations," said Angus MacMil-lan, a senior metals analyst at Shearson Lehman Bros. "Other-

A conditional "rescue plan" pre-sented to the ITC by its creditors has provoked complex and frag-mented reaction from the council's six exporting and 16 importing.

The creditors said that they ex-pected a reply to their proposal by Friday morning. But trade sources said Wednesday that that seemed

nolikely. Earlier Wednesday, the LME chairman, Jacques Lion, sent a letter to Peter Lai, the ITC chairman,

Mr. Gray was here to address

at this week's annual convention of

capital infusion for the FSLIC, if of real estate liquidators and pay the unit's final charter calls for it to competitive salaries.

World Tin Production

saying that "the tin industry world-wide is in complete disarray."

"I am under extreme pre from my board, committee and all members to impress upon you that time for academic discussion is already long past," Mr. Lion said. He also said that he was under pressure to consider discussions on closing London's tin market permanently.

"I have to tell you that I find it increasingly difficult to resist this pressure," Mr. Lion said. "In both monetary and turnover terms, tin is the smallest and least important of

our contract markets."

The ITC has so far given no indication of whether or how it will bonor its commitments to creditors and dealers, estimated by traders at about \$300 million when tin trading on the London exchange was suspended Oct. 24.

Trading also remains suspended on the Kuala Lumpur exchange, the second-largest after the LME. And in Washington, the General Services Administration has second quality delty the process.

stopped quoting daily im prices.
While the LME's an market remains closed and there is no marker for the metal's value, Mr. Lion said in the letter, it is impossible to evaluate the extent of the habilities incurred by the buffer stock man-

Trade sources estimate that in addition to the existing buffer stock of some 52,000 metric tons (68,200 short tens), the stock manager is estimated to have agreed to buy a further 68,000 metric tons from LME brokers and other

the United States League of Sav-If the tin market reopens "with-As industry executives met, their out precise instructions from the ITC," he said in the letter, a "cha-otic sinuation" could result that mood was markedly upbeat. The industry is headed toward the most profusible year in its history, prismarily because lower interest three. could force the sale of 5,000 to 55,000 metric tops of tite "at distahave produced a wide gap between what is paid for deposits and what monsty low prices."

Tin experts from the li-nation European Community, all ITC consumer members, have said than they would not commit themselves to meet the ITC's debts ourstanding until an moi been conducted. ITC delegates said final figures, from an audit now being undertaken were not expected miti next week.

Meanwhile is Malaysia, the world's largest tin producer, Datok Keramat Smelting Sdn and Malay-sian Smelting Corp. said Wednesday that they will resume physical tin sales beginning Thursday at be-low the ITC's floor price.

Mexico Puts Curbs on the Peso to Arrest Free-Fall it inflation, strong government International Monetary Fund speech in the next two weeks to spending and a \$96.4-billion for-about a new aid program to help it coincide with the formal presenta-

MEXICO CITY - Spurred by a plunge in the free-market value of the Mexican peso to a record low against the U.S. dollar, the central bank has announced restrictions on the buying and selling of pesos by foreign financial institutions.

Private currency exchange houses, which set their rates according to supply and demand, were offering 500 pesos for each U.S. dollar on Tuesday and demanded 521 pesos for a dollar. Those rates represent a 35-percent decline in the value of the peso since the middle of September.

The free market peso rate is used in tourism and for most private transactions. A second rate, regulated by the government for most commercial transactions, stood Tuesday at 322 pesos to the dollar to buy and 323 to sell.

Late Tuesday, the Banco de Mexico, the nation's central bank. said it was setting restrictions on the operations of peso accounts by foreign financial institutions and exchange houses.

The impact of the move was not immediately clear, but it likely was intended to try to give the government more control over the volatile currency. Some exchange houses in the

capital, apparently running low on dollars, refused Tuesday to sell dollars to customers and were dealing only in travelers' checks. Ignacio Trigueros, director of economic research at the Mexican Autonomous Institute of Technology, expressed surprise at Tues-day's plunge in the currency, but

predicted that the peso will stay below the 500 level in coming Mexico is faced with double-digwith its foreign debt. The outcome tions later this month of the 1986

eign debt. The nation's limited resources of those talks is still unclear. are being further strained by the ■ Cabinet Shakem Expected cost of rebuilding portions of the capital devastated by the Sept. 19 earthquake. Preliminary estimates have put reconstruction costs at more than \$3 billion.

The currency held at about 380 pesos to the dollar for several weeks after the earthquake, but then began sliding. People are worried about high

inflation and a high exchange rate and decided to shift to dollars to protect their wealth." Mr. Trigueros said. He said the government is under

pressure to print more money to cover its costs, which would fuel an inflation rate already expected to run more than 50 percent this year. Other analysts noted that Mexico is holding discussions with the

Nevertheless, last May, the depaty general manager of Guangdong Nuclear Power Joint Venture Co. Zan Yunlong, warned that China could still turn to other manufacturers if it failed to obtain the prices and soft loans it seeks, New alternatives have recently

opened up for the Chinese side. should the British negotiators drop out again. Separate agreements re-cently reached between China and both the United States and Japan on nuclear safeguards now enable supply companies to enter the competition for China's ambitious nuclear program on an official basis.

Premium Income, Claims Rise in West Germany

COLOGNE, West Germany - Insurers expect premium income to increase 5.5 percent this year, mostly because of increases in the automobile sector, the West German insurance industry association said

Wednesday. But the group's annual report also said that claims were rising. leading to losses on insurance husiness for many companies that would have to be covered by investment earnings

The group expects income to reach about 108 billion Deutsche marks (\$41.36 billion) this year. It said that higher rates and a 2.5-percent rise in the number of cars pushed car insurance premiums up 10 percent in 1985.

Accident, residential properly and credit insurance sectors also are showing above-average premium growth, the associa-tion said. Income from life insurance premiums are expected to use 4 percent to 5 percent to

Claim payments and provisions are likely to be greater than 100 billion DM this year, taking at least 97 percent of

South Korea Warns U.S. Of Retaliation on Trade

SEOUL — South Korea threatened on Wednesday to reduce grain imports from the United States because of growing U.S. protec-

Deputy Prime Minister Shin Byong Hyun told the parliament that the government was considering importing more agricultural products, mainly feed grains, from other countries if talks failed to bring about a reduction in U.S.

curbs on South Korean exports. Official figures show that South Korea imported \$1.25 billion worth of grain last year, about 30 percent of it from the United States.

Dunes Casino Group of U.S. Seeks Chapter 11 Protection

The Associated Press LAS VEGAS. Nevada — Dunes Hotel & Casinos Inc., faced with a growing number of financial and legal problems, filed Wednesday

for protection from creditors under Chapter 11 of the U.S. Bankruptcy Code.

The filing placed in limbo a series of legal maneuvers under way against the troubled Las Vegas resort, which remained open for business. Valley Bank asked a court to appoint a receiver to oversee the resort's operations. The heat to oversee the resort's operations. The bank took the action after the Dunes defaulted on a \$68.6-million loan. The court action was dropped when attorneys filed the Chapter 11

CHANGE OF BEENE

FIRST

In August 1985, Research Services Ltd. released a study of the reading habits of international financial managers in Europe.* The study showed conclusively that more read Institutional investor than any other magazine...including:

- The Economist
- Euromoney
- Business Week
- Fortune Time
- Newsweek
- Der Spiegel

Le Nouvel Economiste

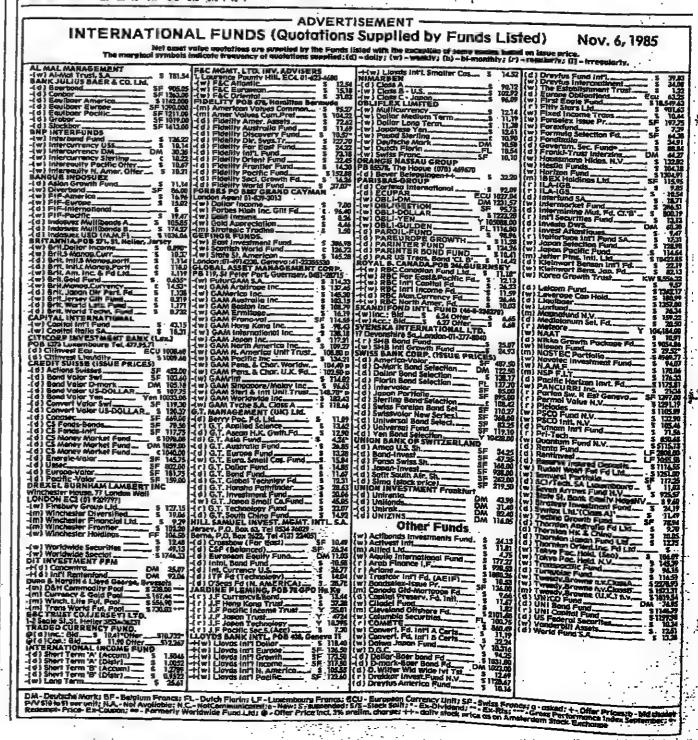

In fact, in virtually every categoryfrom job responsibility of financial manager to industry to geographic location, the story remained the same: Institutional Investor ranked first.

And if worldwide leadership is not reason enough to advertise in Institutional Investor, here is another: thanks to strengthening international currencies, coupled with a new rate structure, an advertising schedule in 1986 will cost international marketers significantly less than it did in 1985.

Put first things first. Contact your Institutional Investor account executive today. Or, contact Christine Cavolina, European Advertising Director, in London at (01) 379-7511. In New York, contact Denise C. Coleman, V.P. & International Advertising Director at (212) 303-3388.

"Co-sponsored by Business Week, The Economist, Euromoney, The Pinancial Times, institutional Investor International and The Wall Street Journal/Europe.

Our exclusively-designed leather pocket diary is thin, flat and elegant.

No sooner was it introduced than everybody wanted one! The International Herald Tribune diary,

started as a distinctive Christmas present for a few of our friends, was such a huge success that now we make it available to all our readers. This ingeniously designed diary is flat as

can be-neat and luxurious-including a builtin note pad. Slips into your pocket without a bulge and is ready with instant "jotting" paper the second you need it. Personalized with your initials (up to 3) at no extra cost. The perfect Christmas gift for almost anyone... including yourself.

 Note paper sheets are fitted on the back of the diary-a simple pull removes top sheet. No curled up edges. No torn pages.

— Comes with note paper refills. PLUS: Pages of useful information.

Ministry of Reconstruction, New Communities & Land Reclamation

Invites Proposals:

From

Qualified REFRIGERATION FACILITY Operators, Developers, Investors, and Entrepreneurs of Any Nationality for the CONCESSION to Build, Operate, Finance and Develop A 50,000 TON REFRIGERATION FACILITY IN THE COMMERCIAL ZONE AT

DAMIETTA PORT

and engage in all related business activities of the international frozen & cold food trade

The first stage of the new port of Damiette is expected to be in operation by the end of 1985. The port is strategically located on the Mediterranean coast of Egypt between Alexandria and Port Said since it will be chiefly a transshipment center for the Mediterranean, the Red Sea and the Middle East areas with cargo fraffic from 6 to 16 million tons annually by the year 2000.

In order to insure a steady supply of imported frozen and cold protein foods available to Egypt in spite of any shortages in external supply and to take advantage of favourable international market prices from time to time. the Government of Egypt desires to provide for a strategic reserve of about 50% (fifty percent) of annual Egyptian import figures and assuming a turnover of four times a year, a total storage capacity of about 50,000 tons is

Accordingly, the Government of Egypt proposes to enter into a concession arrangement with an internationally experienced cold food trader and developer or foreign investor to carry out studies, finance, design, build, operate the facility and engage in cold foodstuff trade based in the commercial zone of the new Port of Damiet-

MOVE YOUR SHADOW: South Africa, Black and White

By Joseph Lelyveld. 389 pages. \$18.95. Times Books, 130 Fifth Avenue. New York, N. Y. 10011.

Reviewed by Vincent Crapanzano

ANYONE who has managed to withstand what Joseph Lelyveld calls the "riot of cuphemisms, analogies and fatuous forecasts" with which white South Africans like to demonstrate their decency is left with a heap of broken images. Like the memories of an unbe-lievable nightmare, these images demand some sort of exorcism, "Move Your Shadow" is in some ways an attempt at exorcism. Lelyveld expresses the anguish, anger, confusion and frustration he felt during the years he was writing from South Africa for The New York Times. His book is, however, no self-indulgence. He rarely sacrifices the events he describes to his own reactions. He is the impassioned vehicle through which the "heap of broken images" — my reference is to Eliot's "Waste Land" — form an extraordinary picture of South Africa.

As a foreign journalist, Lelyweld came to know South Africa the way no South African, white or black, can know it. Within limits he could cross the psychological and legal barriers of apartheid and see the contrasting worlds of whites and blacks, coloreds and Asians. "The difference can be between an 'international' hotel and a squalid rooftop barracks for black migrant workers that is periodically raided by the police. Or it can be between white bus stops conveniently located near the main shopping areas and black bus stops hidden away at the edge of town."

To readers bombarded with daily death counts from South Africa, pictures of mutilated children and reports of torture, Lelyveld's contrast may seem anemic. But that is just the point. Apariheid determines the texture of everyday life. It grinds down the dignity — the sense of possibility — of those it discriminates against, and it deprives the privileged of clan and self-esteem.

The whites spin webs of rationalization around themselves. Leivveld calculated that a copy of the printed laws and regulations of apartheid weighs more than 10 pounds! Vast sums are wasted in maintaining its awkward structure. The South African government spends more on subsidizing the bus trips of workers from Kwa Ndebele to Pretoria than on any single development of that wretched

South African whites have mastered the rhetoric of apartheid so well that they often dupe themselves. Lelyveld describes the "capriciousness of a system that can ban a mug (on which political slogans have been scratched) and release a poem, torture one activist and seem to ignore another." This capriciousness keeps "enemies constantly off-balance while enticing potential collaborators," and, I would add, confuses such outsiders as the American bankers who seriously expected P. W. Botha to announce meaningful reform in August.

Of Hendrik Verwoerd, apartheid's prime

mover, Leivreid writes: "He sounded reasonable because he spoke in scillogisms; the premises were batty, but the conclusions were what his audiences yearned to believe." No wonder there is so much legalism. Logic covers for desire, and in that way no white has to question the premises upon which his South Africa is constructed.

"A system that has to justify to itself its use of harsh interrogration methods." Lelyveid observes, "cannot easily reserve them for saboteurs and assassins, for it has need to incrimanate anyone it suspects in the seemingly illimitable conspiracy that threatens its continued operations. Once a suspect has been tortured the interrogation has to be continued until some shred of evidence vindicating the torture's use has been extracted."

Violence seems to offer the whites one escape from their endiess chains of rationalization. Lelyveld notes ironically — be was writing before the latest rioting — that "the major arens of interracial violence remains the highways where the death rate. . . is at least four times what it is in the United States, with blacks, who own fewer than 15 percent of the vehicles, accounting for more than 60 percent of the deaths - a statistic that can only partly be explained by the alleged carelessness of black pedestrians, who are the main victims. For more and more blacks, violence appears to be the only means to bring about significant change. For them the question is how to make a commitment that will be more than a sacrifice, particularly when so much of the world. ames that a solution to South Africa's problems will have to come from the whites. Lelyveld paraphrases Winnie Mandela: Consume-tive engagement means "telling blacks to call off their struggle because the bosses are work-ing it out." ing it out."

So psychologically powerful is apartheid that violence seems also to provide the only-contact between whites and blacks. There seems to be no real understanding between them. A white woman, on some philanthropic mission to a Cape Town squatter community, spoke to a black man there in baby talk. "We sorry you not have house, permit, warm clothes like us. We 'very' sorry." The woman meant no harm. She saw only a victim. The black man's response was a dismissive, "Oh."

After the Bulawayo massacres in Zimbabwe, Lelyveld forced himself to visit the refrigerator. cars filled with the dead. Among the Africans looking for their relatives, he spotted an Afrikaner in powder-blue shorts and matching knee socks with his two adolescent sons. Lelyveid imagined he was showing the boys what blacks do to themselves when they rule.

But, he learned, the Afrikaner had brought his sons to see the dead firsthand so they would stop making wisecracks about the recent kill-ings. "I bring my sons here to see firsthand what they are speaking. . . I just want them-selves to leet, 'Hell, this is terrible,' "he said. "I want them to stop talking about it, really." Lelyveld assumed he was speaking for peace and humanity. But perhaps he meant simply there was nothing to say. The horror, Lelyveld tells us, is that it can all go on indefinitely.

Vincent Croponzono is the author of "Wait-ing: The Whites of South Africa." He wrote this review for The Washington Pass.

By Alan Truscott

The diagramed deal would have no particular interest at team play or in rubber bridge but brought out two of the significant features of match-point scoring - overtricks and the no-trump ad-

South's auction, as shown, began with a Precision Club, which, in it's style, has a 17point minimum. North had barely enough for a positive response, and showed his dis-tribution by bidding spades, diamonds and finally clubs. taional raise to four no-trump, and the parmership had avoided the obvious 5-3 spade fit.

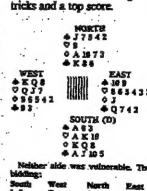

It was not difficult to make 10 tricks, but it needed careful bearts and so collecting timing to maximize the overtick possibilities. The beart queen was led and taken with the king. The king and queen of diamonds were cashed; and a diamond was led to the ten Taking the diamond ace would have been premature, and

South finessed the club jack. Then followed a chub to the king, the diamond ace and another club linesse. When the club ace was cashed, West had to part with his established diamond winner, to protect the

Moroccan Gold-Medalist Remains a Symbol of Hope

By Julie Cart
Los Angeles Times Service
AMES, Iowa — Long before she
won the 400-meter hurdles in the 1984 Olympics, the first time women had run that event in the Games. Nawai El Moutawakel of Morocco was breaking barriers.

But that victory was her biggest. Her gold medal became a symbol of victory for African women, for Arab women, for Moslems, for the Third World.

To a watching world, El Moutawakel's tears were tears of joy and pride - and amazement because for her to even have made it to an Olympic final was all but beyond her hopes. To have won was simply amazing.

"I used to run with my dad," El Moutawakel said, sitting behind the desk in Coach Ron Renko's track office at Iowa State Universi-"He used to take us to the beach and draw a line like this and say, When I do my hand like this, you run to me and stop.' I used to beat my cousins and my brother. It was no big deal. My dad used to give me

candy for winning."
The father recognized the daughter's aptitude, but was not sure how to direct it. Theirs was a society requiring that women's bodies be fully covered. Most Moslem fathers would have been shamed if their daughters had competed against boys, Mohamed El Montawakel

"My dad lived with some French Moutawakel said. "He grew up, I would say.

"He always taught us the way these people lived and the way they taught their children. My dad was very liberal by Moroccan standards. When I traveled to Europe for track, I saw other societies and how people lived. When I came home, I would tell my father and my brothers how these people lived. We were a relaxed family, different from other Arab fam-

El Moutawakel, now 23, was discovered by the Moroccan track and field federation when she was 15 and outrunning all the boys in Casablanca. She began to travel with the national team when she was 17. She was immediately successful, but she was looking to get out. She and her father agreed that

able to her in Africa, size wash't "On our way to the airport, he said progressing. The more she thought about it, the more convinced she became that she should look for a school in the United States.

At the 1983 world champion-still ships in Helsinki, she struck up a go." conversation with Nigerian Sunday Utt, who had a scholarship at Iowa State. Uti lest with E. Montawakel's address and promised she'd hear from the women's track poach. El Moutawakei shrugged

"One day I got a big envelope from the States." sine said. "I showed my dad. They sent me forms to fill out. But we weren't really sure. I put it away. It was a big decision. Then all of a sudden one day I started to fill out the forms. I took them to my father, 'Here, I want you to sign this.'

"He said, 'You are acting for real. Now we go 100 percent." That meant eight hours a day of English anguage instruction.

Her father was torn by a desire for his 20-year-old daughter to succeed and uncertainty at sending her to a foreign land and society. "He to coach distance runners. He said was crying when I left," she said. that his experience in a Moslem

"No!" and then he went back. He made the turn and he came back home. He said, 'I got to get something.' There was nothing. He was still thinking he didn't want me to

El Moutawakel arrived in Des Moines on a severe January afternoon. Neither Renko nor Pat Mosnihan, his assistant, was able to meet her at the airport. Instead they dispatched a member of the women's team.

"She drove me to Ames." which is about 25 miles [40.2 kilometers] north of Des Moines, El Moutawakel said. "I didn't know what was happening. I said, 'Where are we going? Why are we driving so far? Where is Iowa State University? Are you Pat? Is Pat a man or a woman?

Pat Moynihan was, and is, a 220pound [99.7-kilogram] former hammer thrower from Princeton who spent more than a year in Saudi Arabia getting paid a lot of money

"The first thing I noticed about her was that she was a dedicated athlete." Moytihan said, "She decided that every workout had to be done with great intensity. Fine, but there were some workouts I didn't want that. Luckily I knew how to say, 'Shewa' — slow down."

She had been away from Moroc-

co for a month and a half when she got a call from her oldest brother. "My father had died [in a car accident] the first week I was here, eight days." El Moutawakel recalled. "They decided not to tell me.... My brother called me and he said, 'I am coming.'

"I say, 'What for?' "He said, 'My dad wants me to living.' I wasn't sure what was go-

Her brother arrived, and his duty was to tell El Moutawakel the details of their father's death, and to take her back to Morocco.

"I was talking to my mother lat-

country helped him in coaching El er, and I think one of the reasons he Moutawakel. "I knew what not to do," he said. He greeted her in Arabic, and a friendship was born. locked himself in a room and he wouldn't talk to anybody. He was just thinking. What have I done? Did I make a mistake to send her there?" I think when he had the accident he was thinking about me. It was dark outside. His car just crashed. He died."

And here was her brother, ready to take her home. But she didn't go. "Ron and Pat came and talked to me. I understood, I said. My dad now is gone. He sent me over here to improve and to go to school.' I end up staying here because I want to achieve his dream of what he wanted me to do."

After her Olympic victory, Morocco's national treasure had become a treasure as well for the come over and see how you are entire Arab world. Suddenly, E. Moutawakel was a symbol.

"I feel a big responsibility," she said. "In the Arab press, they don't come to interview me to know what are my [track] goals, like the Americans and Europeans. They say, 'How do you feel now that you are a symbol? You have saved Arabic women. Arabic women used to be in jail. Now that you won, it's going to allow them to come out and work out and race. How do you

"I don't know what I should say, They ask me political questions. just don't know what to answer. I 52y, 'Hey, all this stuff is not for

"All I know is that the obstacles I jump, the hurdles, are true for me. can touch them. I can jump them. I

know that it is true. "They say, 'You can't imagine what you mean to other Arab women,' but I know. I read the newspapers and magazines. I receive much mail from girls who want to be like me. I understand the feelings of

these women. But I don't know how to be a symbol." What she wants is to be the world-record holder. "In my life, I like to have a better situation," shesaid. "I believe you should light so you can be better. I do what I have to do to be the best. I don't think !-

have reached my peak. "My goal for 1986 is to break the world record. That has always been my aim and my dream, and the

"We felt we could run with the Lakers, and Bag had a great night." Karl said. "It's a great victory. Last year we came in nere after winning six straight and got blown out by 25. It's strange, but we play better on the road. We have not won at home yet, and this is our second win on the road.

"We stay mentally into the game on the road. I don't know why. Maybe because we are away from

Cleveland led, 37-30, after one quarter, and hit its first 13 shots in the second period before moving out to a 75-57 buige at halftime. The Lakers, now 4-1, never threatened in the second half.

"You can't make mistakes against them." Jones said. "We kept ours to a minimum. "I won't say they thought I was

the weak link, but they were leaving me open for my shot," said Jones, who is averaging fewer than nine points per game for his career. "We came to play as hard as we could. We aren't going to be blown away anymore. We are earning our respect in this league." (AP, UPI)

Astros Hire **Hal Lanier** To Manage

The Associated Press HOUSTON (AP) - Hal Lanier, a coach for five years under Manager Whitey Herzog of St. Louis, has signed a two-year contract to manage the Hous-ton Astros, the National League baseball club an-

nounced late Tuesday. In replacing Bob Lillis, who was fired Oct. 7, Lanier becomes the ninth manager in Astro history. Houston finished third in the Western Division in 1983, tied for second in 1984

and tied for third last season. Lanier said he would like to convert the Astros into an ag-gressive, base-stealing team. "I don't like to see a club that goes buse-to-base," he said, "and I think that's the type of club the

Astros have been." Lanier hopes to hire veteran manager Yogi Berra as an assis-tant coach. I talked to Yogi yesterday," he said. "and we think he'd be a good addition. It would be nice to have him there if I want to ask a question."

An infielder, Lanier ended his major-league playing career in 1973. As a minor-league manager in the Cardinal sys-tem, he led Gastonia to the Carolina League title in 1977, and in 1980 took Springfield to the American Association championship. The son of former Cardinal pitcher Max Lanier, he joined the St. Louis staff as a coach in 1981.

Haworth Spurs Capitals

Stately New York Homes

WASHINGTON — Years ago when Jackie Onassis was the first lady of the United States, she conducted a TV tour of the White House. My sister was so inspired by the event that she gave me a tour of her three-room apartment in Queens, New York.

I was under the impression she had retired from the stately home business until I received a call from

her the other day, "The Brit-ish swells have sent their greatest art treasures to the National Gallery Gallery in Washington this month," she said. "What are we sending them in return?

Buchwald

cial that I know of," I said. 'That's what I thought. My girlfriends and I have a great idea. In exchange for the English lending us their heirlooms we would like to ship them treasures from the homes of Flushing, New York,"

"You told me the people of Flushing would never let their heirlooms out of their houses." We're now willing to do it provided they are insured by Lloyds of

"Who is we?" "A few homeowners in my neighborhood. We call ourselves the 'Magnificent Six.' We would have been the 'Magnificent Seven' except Martha Bordinsky's slipcovers won't be ready for months. The thought we had is that if the British are willing to display what they have in their stately homes we should give them some idea of what

"What art treasures are you prepared to send to them? I'm willing to lend The Blue Boy' - the one I bought in a garage sale in Astoria last year."

Pacific Folk Art Sold to Japan

The Associated Press LONDON -A collection of Pacific folk art, including canoes, masks and weapons, has been bought for £600,000 (about \$857,000) by the National Museum of Ethnology in Osaka, Japan, Newcastle upon Type University announced Tuesday.

original 'Blue Boy' or not?" The man who sold it to me said if it wasn't the original it came willing to part with treasures. Doris Dembow wants to send a needlepoint sampler which she made her-self, titled God Bless Our Home."

"That's classy. The only place I've ever seen anything like it was in u Hallmark greeting card shop."
"Barbara Lupin has offered to

part with a color photo of her grandchild. She says it has never been shown in public before. But she won't lend it unless a guard is stationed in front of it day and

"The Tate Gallery has plenty of guards. What other treasures would

you like to send to London?" "Laura Brown has a pair of Ron and Nancy Toby mugs which she purchased in Atlantic City. They were crafted by skilled artisans in Hong Kong, and the shopkeeper told Laura that they were already collector's items."

"I may be wrong, but I don't believe the British have ever seen a Hong Kong Toby mug before."
"What we're trying to do is orga-

nize our treasures so that it gives the English some idea of how the bluebloods live in Flushing. We have Myra Stieglitz nearly talked into parting with her queen-size sleeper sofa. It's an heirloom because it has been used by three generations in her family. What is so special about it?"

"In the daytime it can seat three people, and at night all you have to do is remove the cushions and it turns into a bed."

"Why is Myra hesitating?"
"She is afraid if the Tate Gallery borrows it, her kids' friends won't have anyplace to sleep when they come home on school vacation."

"You seem to have everything under control. Why did you call

"The girls wondered if you would contact Prince Charles and Princess Di and ask them to stop by to preview our art treasures on their way to Kennedy airport."

"I would be happy to. One more thing. I'm curious about how you selected the masterpieces for the

Portrait of the Artist in a Platinum Hairpiece

Washington Post Service
WASHINGTON — The plat-Washing ION—The plat-inum wig is perched like a Pekingese above his own black hair. His dry lips float in a face the color of chapped hands. It's Andy Warhol, king of the club crawlers, Lazarus of the under-ground gone uptown, and for the next week, prisoner of his own

"My editor is making me do is," he says cheerlessly, "so l

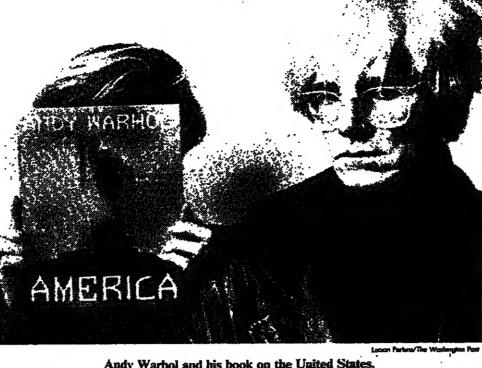

Somewhere deep inside his huge black leather jacket ("it's Calvin Klein, but I only wear Stephen Sprouse"), his shoulders sag. His book editor, who looks a bit like Tab Hunter, hovers nearby. Warhol licks his lips, his dark eyes glitter behind the neon-pink glasses. It is a painful sight: portrait of the artist waiting to have his teeth drilled.

The new book is called "America," a collection of photographs of the fey and famous, and pen-sees like this (flanked by a picture of Howdy Doody):

"What I don't understand is why every time an underdeveloped country starts to get developed, the first thing they do is manufacture knickknacks and send them over here. I mean stuff like musical toilet paper dispensers and calculator pens. Who gets them started making these things? Why don't they show them how to be self-sufficient foodwise?... It ends up that we're sending guns and food to the world, and the world is sending us doodads."

He promised everyone 15 minutes in the spotlight, but he's been cruising the fame lane for more than two decades, the prince of Pop Art, the Campbell's soup can man. He is signing copies and doing interviews in Washington, then on to Detroit. Chicago and Los Angeles. It is going to be rough sledding because he can't think of much to say about the book. Answers to questions trail off into desperate silences. He looks at his hands, smiles politely, cocks his head. "There are people who really love to talk, and they should. I never think I have that much to say."

There is a long silence. A siren wails outside. Somewhere people are having fun. "Well," he begins again, lifting a hand toward the song."

Andy Warhol and his book on the United States.

window, "it's so beautiful down

Outside the Govinda Gallery in suburban Georgetown, the young and the restless have begun to line up for the book signing. Most of them well under 25. Curious, reverent, excited, waiting patiently for the Bruce Lee of bland, shrewd as the neighborhood loan shark, a pale, weak-eyed water bug quivering his way across the fluid surface of American life.

"It's neat," says a pilgrim. "It's not like the Picasso stuff where you can look at it for hours and not be able to figure it out." The Govinda Gallery has the

Warhol franchise in Washington. Huge silk screens line the walls: endangered animals, the Cologne cathedral, Ronald Reagan's Van Heusen shirt ads, Judy Garland preening in Blackglama. Take one home for \$2,000 and change. "In the '60s," says one browser, "you could have gotten them for a Copies of the book are piled on prince of Ether, the ultimate institubles, awaiting his fat, black signature. "It is a work of blinding insight, a book of strange beauthe jacket note swoons. Andy at his funniest and most touching. . . . A love letter, a remembrance, an astonishing portrait of modern life."

Warhol licks his lips again and looks embarrassed. "It's a diary. Since I have no memory, I take pictures. I don't know why I don't have one. I wish I did. I don't know, I'm just missing a brain chemical that does that to me."

He was maestro of the Warhol Factory and film school, Svengali for art tarts with names like Viva, Pope Ondine and Billy Name. And Edie Sedgwick, the incandescent Yankee debutante, Warbol high priestess, whose druggy de-cline and fall was chronicled in a 1982 biography that detailed the squalor of their world.

After the book appeared, re-viewers dubbed Warhol the Andy Warhol."

Interview magazine, the ad-heavy tabloid. Now he is doing TV videos and modeling for Ford ("Live shows, that's what I really wanted to do, trying to get less scared and shy and stuff like that") and signing books, signing posters, silk screens, postcards, snapping pictures, parties, parties, parties. The book is bursting with pic-tures of celebrities: the McGuire sisters, Melvin Laird boogying. Capote in profile with black

He seized the surface and made it his with his vibrant, icono-

graphic silk screens of Marilyn Monroe and others. He created

stitches from a face lift showing. Farrah Fawcett and Ryan O'Neal. "He and Farrah must be the most beautiful, most American couple," the text croons. Phyllis George, "Aspen's John Denver," Nancy Reagan, Ronald Reagan, Ron Reagan Jr., Doria Reagan, lots of Reagans. Nancy Reagan calling Warhol by his first name. A shy gry, Mr. Main-stream, Andy Workaholic.

"Everything that seems wild becomes mainstream today," ex-plains Craig Nelson, a book editor. "Nowadays every issue of People magazine covers at least one eccentric person and David Letterman has a whole show somebody's on every night. There's always a thing about downtown moving uptown."

Why does such a shy guy go out so much? Before Warhol can answer Christopher Makos, photographer and Warhol protege, self-conscious imp, whirls from his perch at the other end of the room and answers: "To make money."

The art critic Calvin Tompkins once described Warhol, who grew up, by the way, in McKeesport, Pennsylvania, the child of Czech immigrants, as having pursued fame with the "singlemindedness of a spawning salmon." Warhol dismisses that, saying that he just thing Andy would have liked to likes meeting new people. "I try with the magazine to meet new people and faces and fashions. Uh, it's like every day's a new

> He brightens visibly for the first time in an hour when told that Interview is one of the magazines to be included on the royal night table during the three-day visit of Prince Charles and his wife Diana. "Oh, really? God!"

The organizers, including Bob Geldof, of Live Auf fame, hope to raise \$1.4 milion from ticket and T-shirt sales and donations, plus \$2.8 million by selling videos of the show and Fashion Aid T-shirts be the designers.

Jewish protesters will continue to block the staging of a controversial Rainer Werner Fassbinder play, a spokesman for the Frank-furt Jewish community said Tuesday, while theater critics argued that the play was not anti-Semilic. Michel Friedman said that the Jewish group would stick to their plan of blocking the performance of the play, "Der Müll, die Stadt und der Tod" (Garbage, the City and Death), whose premiere was can-celed last Thursday after Jewish ticket-holders occupied the stage, and postponed again Monday. Afand postponed against the play conducted for journalists and the atter critics on Monday, many conchided the play was not anti-Semitic. They said that the staging de-emphasized the central figure, and focused instead on the life of a prostitute befriended and later killed by "the rich Jew." The premiere is currently set for Nov. 13.

José Caballero, 24, a furniture store deliveryman who won \$2 million in the California lottery this week, may also have won a free trip back to Mexico. Caballero is in the United States illegally. "He's no different than any other illegal alien," Harold Ezell, regional commissioner for the Immigration and Naturalization Service, said in San Jose, California, on Tuesday. "He will not get preferential treatment nor get ignored by us because he won all this money." Ezell said Ca-ballero has two choices. He can return to Mexico voluntarily, or face a deportation hearing before an immigration judge.

ANNOUNCEMENTS

REPUBLIC OF MALAWI CONSTRUCTION OF THE CHAMPHOYO-MBOWE SECTION

OF ROUTE M12 CONTRACT NO. 21/83

PRE-QUALIFICATION OF TENDERERS

The Republic of Molowi has applied for a Credit from the African Development Bank (ADB), part of the proceeds of men standard a section of the main north-touth road between Champhayo and Mbowe, together with a sour from the main road to the town of Mamba.

The works are located in the northern region of Malava and the total length of road to be constructed will be approximately 65 telemeters, comprising the 47km Champhoyo-Mbowe section and the 18km Malmbo spur.

The Champhoyo-Mbowa section runs northward from Champhoyo, which is some 290km from the capital, Libergree, to which it is connected by a surfaced road. Mbowe lies southwest of Mazzu, the main urban canter of the Northwar Region, to which it is linked by 17km of surfaced road. The new obgreent gareetly follows the existing unsurfaced M12, running through hilly terrain, ranging from 1500 to 1800 meters above sea level.

The Maimba spur departs from the existing surfaced main road of a point some 35km to the south of Champhoya and generally follows the existing unsurfaced MI through easy terrors at an altitude between 1300 and 1300 meters.

The surfaced cornageway width will be 6.7m with 1.5m shoolders. Earthwarks will overage about 13,000 cubic reters per kilometer on the Champhoyo-Mbowe section and somewhat less on the Altamba spur. Sub-base and shoulders will generally be of natural growel, but some sections of sub-base and oil of the road base will be crushed rock, the latter being topped with a two cost surface dressing. There will be a rushber of large pipe culverts.

Pre-quolification will be determined on the basis of financial capability & previ-ous & current expension in the con-struction of similar projects. Any special requirements & conditions by ADB will also be taken into consideration.

contractors who respond to this mate and can, inter also, satisfy the pre-qual faction requirements of the Republic of

he says. "Well I just read a little

bit of it, well the book was about

Edie and I thought there was a lot

of stuff about me that wasn't - I

had nothing to do with Edie, I

didn't really know her that long but Jean Stein kind of stuck me in

as somebody really important and

Warhol: "I think Edie was some-

have been: he was transposing

himself onto her a la Pygmalion.

Have you ever noticed a certain

type of man who always wants to go along with his wife to pick out her clothes? I've always thought

that's because he wants to wear

them himself. Andy Warhol

would like to have been Edie

Sedgwick. He would like to have

been a charming, well-born debu-

tante from Boston. He would like

to have been anybody except

Truman Capote once wrote of

I wasn't."
